

Dr. Joseph Chan, a scholar with multiple talents

Dr. Joseph Chan received his Bachelor's and Master's degrees in physics and a Ph.D. degree in neural sciences. He also holds a Master's degree in electrical and computer engineering. Dr. Chan's research interest had been in the effects of sound signals, including noise.

Dr. Chan received a patent as a result of his collaborative research in developing a computer-based diagnostic process. Since joining the Division of Computer Studies Dr. Chan had devoted his efforts, together with his colleagues, in the development of computerized application processes in dietetics as well as in education.

In recent years Dr. Chan has focused his efforts in the development of educational programs in airport operations and aviation logistics, which are relatively new programs in Hong Kong. To widen and depend students' understanding in this growing area, he has organised many extra-curricular activities for them, including site visits to Hong Kong International Airport, and airports in Singapore, Shanghai, Macau and the Pearl River Delta. He also liaised with major logistics and aviation companies such as Jardine Aviation Services Limited, Cathay Pacific Catering Services, Hong Kong Air Cargo Terminals Limited, Heli Express Limited, and Menzies Aviation for student internships.
