

**Chan Chun Kit**

**Student of Associate of Business Administration (Financial Services)**

It is my dream to work in the banking sector as Hong Kong is a famous international financial centre. I am glad that I have been admitted to CCCU's programme of Associate of Business Administration (Financial Services). I am currently a year 2 student and going to graduate next May.

During the first year, I learned a lot of new subjects that I had never come across before as I was a science student. I learned Accounting, Economics, Marketing and Statistics, which are all very practical and useful.

Other than professional knowledge acquired in different subjects such as the mechanism of our economy, the operations of the financial institutions, and the features of different financial instruments in the market, the most important of all is I have developed my own career goals.

Studying in the college helps me to rebuild my confidence in studying and getting along with my peers. Furthermore, I am really excited I have been nominated by my lecturer for the Wing Lung Bank Award.

I am looking forward to studying in the Faculty of City University through the special admission scheme and getting my Bachelor's Degree in two years' time before my dream comes true.
