

Mr. CHEUNG Yu Ting, Lester

Graduate of Associate of Social Science in Public Administration and Management (2007)

First Class Honours in Bachelor of Social Science (Honours) in Policy Studies & Administration,
City University of Hong Kong (2009)

The two years of study at CCCU was absolutely memorable and inspiring. Without the guidance and inspiration provided by teachers there, I could not have built up the solid academic foundation that supported my further study. The courses I took not only cultivated my critical thinking and analytical ability, but also equipped me with a global social science perspective. Though our learning journey was full of challenges, the teachers, who were mentors as well as friends, never failed to offer their guidance and support. CCCU also allowed me to gain experiences which enriched my non-academic skills as I took part in various out-of-classroom activities. These opportunities helped me discover and develop my aptitude and potential, which are critically important to my present career and in fact to my future long-term development.
