

Yip Kit Yu, Yuki

Student of Associate of Social Science in Applied Psychology

Winner of Entrance Scholarships for Outstanding Students

As a freshman of the Associate of Social Science in Applied Psychology at the Division of Social Studies, I have had a great learning experience throughout this year.

All the teachers are professional in their field, and they are willing to help us with our academic problems and assignments. Moreover, the professional knowledge I have gained in this programme is very interesting and useful. The University has given us many precious chances. I have had the chance to get the scholarship, and I have had the chance to explore professional knowledge in the field of psychology. These chances let me develop my potential to the fullest, and make full use of the time I have spent here.

The learning experience I have gained at the Community College of City University has actually gone beyond my expectations. It has been a fruitful year in which I have been equipped for further study and become more mature and ready for the challenges ahead. My first year at CCCU is filled with joy and happiness. I do really enjoy this year.
