

Cheng Chu, Ally

Graduate of Associate of Arts in Bilingual Communication Studies (English and Chinese) in 2007

Student of Bachelor of Arts, University of Hong Kong

Enrolling in the Community College of City University was the turning point of my life. Two years ago, I started my associate degree in Bilingual Communication Studies in English and Chinese. The programme provided a broad-based learning environment for us and gave us a very good platform to explore more in the field of language and communication studies. Apart from the core courses, I had chances to study French and Spanish which have now become my interests. During these two years, I found my direction in pursuing language studies.

Not only did the programme broaden my horizon and let me meet new friends, but it also improved my skills in working with other people and enhanced my communication skills. It even helped me to develop leadership qualities by offering me opportunities to be a student mentor and a student reporter.

Life in the Community College of City University was full of excitement and filled with warmth. Although we had to face challenges from all sides of the learning environment, the encouragement from our caring teachers became the driving force that prompted us to pursue excellence. That's why most of us have developed a very strong sense of belonging towards the College.

Everybody has to go through transformations in life. Definitely, I learnt and grew in here to become a better individual. The programme has equipped me with invaluable skills and knowledge in mastering languages. The knowledge I have acquired here is very beneficial to my further studies.

Needless to say, it has been a rewarding experience studying at the Community College of City University. When I look back over the past two years, my heart is filled with fond memories, happiness and laughter.
