

**TUNG Wai Ying**

**Graduate of Associate of Science in Airport Operations and Aviation Logistics in 2005**

In the past two years, the programme has equipped me with essential and useful knowledge on the aviation industry. Thanks to the support from the teachers, I have had the chance to work as an intern at the Jardine Aviation Service Limited. This invaluable experience has enhanced my knowledge on the operation of a ground handling agent. The programme has also offered me numerous opportunities to visit organizations in the field, such as Cathay Pacific, and Changi Airport in Singapore. All these co-curricular activities have broadened my horizons and deepened my passion for a career in the industry.
