

**Chan Yu Kwan**

**Student of Associate of Science in Creative and Interactive Media Production  
Winner of Student Service Award**

During my two years in the Associate of Science in Creative and Interactive Media Production, I have gained a lot of knowledge and practical experience.

Apart from focusing on the quality of teaching, the College has arranged an array of extracurricular activities for its students. In particular, the internship scheme enables students to learn more about the industry. This kind of hands-on training plays an important role in preparing students for their future careers in related fields.

In the summer, our classmates formed a team to produce a promotional video for each of the divisions. We have applied the media creation and production techniques in the project. We are very proud to be the winner of the CCCU Service Award. This programme has sharpened my view on the media industry, and I have full confidence in my future career.
