

My learning experience in AABCSFE was always an exciting experience to share with my friends. Within 2 years' time, we have learnt lots of things in different areas. We focussed not only on the language skills but also on the pragmatic ones.

We studied every aspect of the French language (reading, writing, speaking and listening) as well as French Culture. Don't think it is a serious and boring language course. The professors are nice and knowledgeable and they use a rich variety of teaching materials to enhance our learning effectiveness. I still remember that we once tried French food and beverage in a French culture class.

Also, we learnt how to apply our knowledge in the real business world. We have done some courses related to doing business in French and English. We were asked to prepare a promotion proposal and desktop publishing for a business. It was very helpful to our future career.

Although I am not studying French now, I still can apply what I have learnt in AABCSFE and it is still useful for my study.

Year 2, BA in English for the Professions, City University of Hong Kong

Cohort 2005 – 2007

My time spent in AABCSFE was always memorable.

Thank you for the excellent teaching and the scholarship given by City U. I went to France to do a summer course in Dijon. I learnt a lot about French culture and made many friends from different countries.

I've got to know friendship is so paramount that I cherish every moment with my mates in FE.

I had an excellent time during both of my two visits to France. The reason I was able to appreciate my time there was all the knowledge and experience I gained over 2 years as a student on the bilingual communication studies (French & English) course. It was a perfect preparation!
