

Li Chun Man

Graduate of Associate of Business Administration in Financial Services in 2007

Student of Bachelor of Business Administration in Financial Engineering, City University of Hong Kong

CCCU has given me a great learning experience and provided me with the opportunities to learn in many aspects.

The design of the ABA programme is well balanced; courses in different business areas were taught. I have gained a comprehensive scope of knowledge in Business Administration and my interest in financial services was enhanced after I took courses in this field of study.

Moreover, the teachers in CCCU are very helpful. They have guided me along in various issues, like academic matters, further study and career planning. With their help and support, I can have a clearer picture of my future.

I had a fruitful time at CCCU by taking part in both academic and extracurricular activities. And I feel that I am competent and well-prepared for my current study in BBA(Financial Engineering) in the Department of Economics & Finance at City University of Hong Kong.
