

Tam Kit Ying, Fion

Graduate of Associate of Arts in Translation and Interpretation in 2008

Year 2 Student of Bachelor of Arts, University of Hong Kong

Studying in the Associate of Arts in Translation and Interpretation is certainly one of the most colourful moments in my life.

I still remember every moment of my study during the past two years. The courses are specially designed to strengthen my knowledge in Chinese and English, as well as the essential skills and theories in translation and interpretation. These give me a clearer picture of what translation is. Moreover, I have had the chance to visit the High Court and find out how interpretation is actually done in the courtroom. This has widened my horizons and made me love translation even more.

Of course, all the excellent courses and invaluable chances are designed and provided by my dedicated teachers. They have taught us with patience and passion, not just the concepts and theories from books and notes, but also their experience in life. They looked over our shoulders, and guided us towards excellence. Moreover, with their encouragement and support, I participated in the International Youth Exchange Programme organized by the Government and was chosen as a youth delegate of Hong Kong to visit the United Kingdom. This is certainly one of the most remarkable achievements in my life, and I would like to thank my teachers from the bottom of my heart.

After these meaningful two years, I can proudly say that I have made the best choice in my studies. What I have learnt and acquired in the Community College of City University has certainly given me the key to a brighter future.
