

International Conference on Molecular Electronic Materials and Devices

MEMD 2015

5-8 January 2015, City University of Hong Kong, Hong Kong

First Announcement

The conference will cover all aspects of molecular/polymeric optoelectronics including new materials and different devices as well as their characterization and theoretical modeling. Other than the conventional topics, we will also put particular attention on the following “hot-spots”:

- ❖ Perovskite solar cell.
- ❖ Thermally Activated Delayed Fluorescence.
- ❖ Applications of graphene & carbon nanostructures in organic optoelectronics.

To encourage participation of students and post-docs, there will be several Best Poster Awards.

Deadline for abstract submission: 30 Nov 2014

Registration fee:

Full delegate: US\$600 (including banquet)

Students: US\$300 (banquet not included)

Chair: Prof C.S. Lee, CityU of HK

Co-Chair: Prof C.M. Che, HKU

Prof K.W. Cheah, HKBU

Sponsor:
