

## Virtual Private Network (VPN) Connection Setup Guide for Android Devices

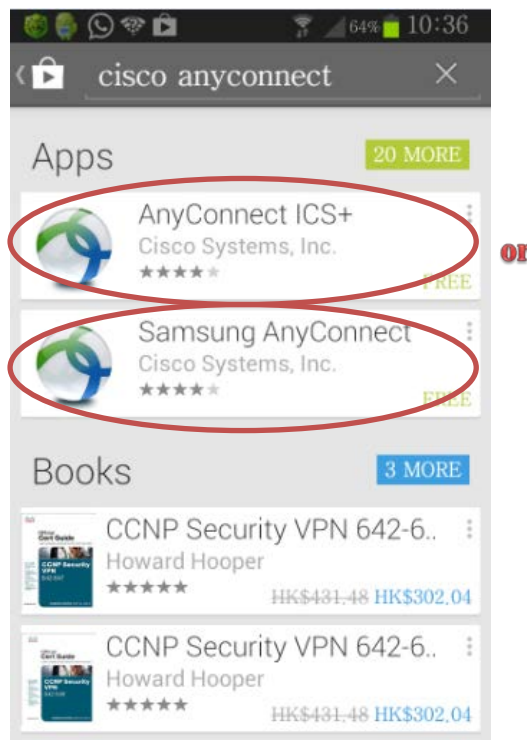

This manual shows the procedures to set up CityU VPN connection on Android device.

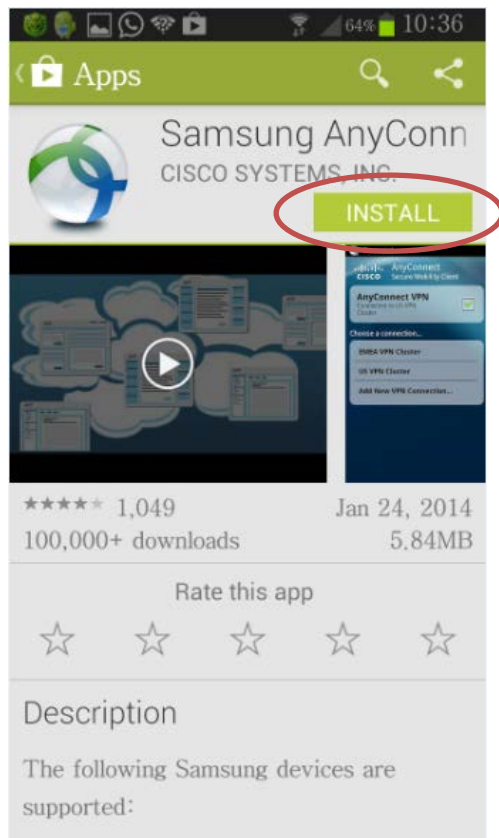

Prerequisites:

- Internet connection such as your broadband or wifi network
- CityU EID and network connection password

### **Procedures**

1. Depending on the OS version of your android device running, you can go to the “Play Store”, “Android Market” or similar to search for the “**Cisco AnyConnect**” VPN client. It may return several versions of the Cisco AnyConnect apps. Read the descriptions of each AnyConnect app carefully. Download and install the one that matches your device:

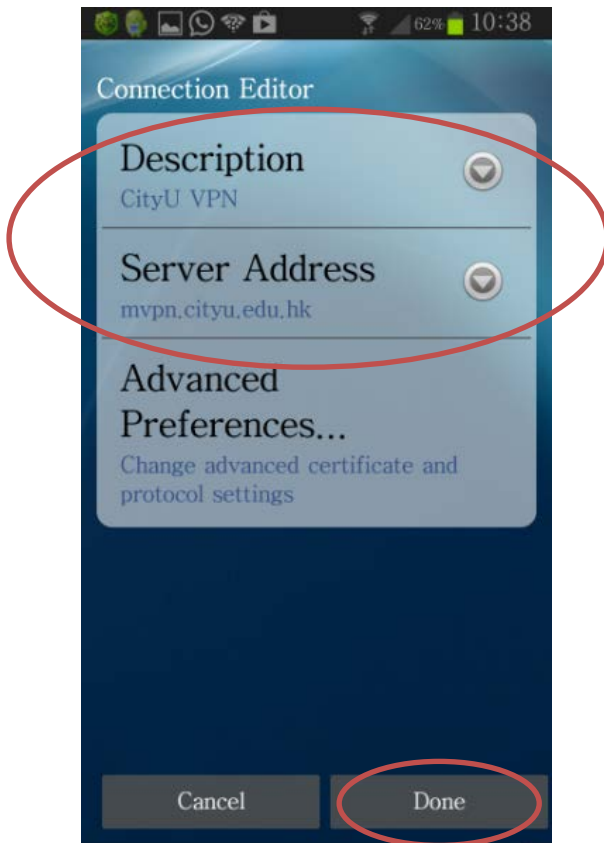

2. Run the AnyConnect app, tap on “Add New VPN Connection” to create a VPN connection profile.

3. Enter the following settings:  
Description: **CityU VPN**  
Server Address: **mvpn.cityu.edu.hk**

Tap "Done" to save the connection profile.

4. Tap the "CityU VPN" to make VPN connection.

5. Enter your EID and network connection password to establish connection.
