## 風車草 (Umbrella Papyrus)

## Cyperus involucratus

常綠多年生植物,原生於非洲熱帶地區。根莖從泥土長出像傘子的葉,葉片由 幼長的葉組成。夏季會長出白花。風車草形態特別及可以適應濕潤環境,因此 被廣泛栽培作為水生植物。

Umbrella Papyrus is an evergreen perennial plant which is native to tropical region in Africa. Its leaves come from rhizome in soil, formed by long and narrow leaves that looks like an umbrella. It bears white flowers in summer. Umbrella Papyrus has a special form of growth and can adapt to wet environment, therefore it is widely cultivated as a water plant.
