Limit results to documents per page

Publications: Select All Unselect All
 Access Device Fraud and Related Financial Crimes
 Advances in Fingerprint Technology, Second Edition
 Advances in Forensic Applications of Mass Spectrometry

3. Choose display options.
4. Sort by **Hits**, **Title** or **Size**, as appropriate.
5. Limit results, if desired.

7. Click the **Search** button.

2. Check box(es) to select **Search Types** if desired:

Stemming - a search for variations of words. E.g., a search for *applied* would also find *apply*, *applying*, *applies* etc.

Phonic - a search for a word that sounds like the entered word and begins with the same letter. E.g., a search for *Smith* will also find *Smithe* and *Smythe*.

Natural Language - a search for any combination of words, phrases, or sentences. E.g. *applying statistics in the courtroom*. Noise words (e.g. *if*, *the*) and Boolean operators (e.g. *not*, *or*) are ignored.

6a. To search all publications, choose **Select All**;

Or
 6b. To search specific titles, choose **Unselect All** and then check the box(es) next to the title(s) of interest.

Search Tips

- Use Boolean/proximity operators to broaden or narrow search.

Operators	Examples	Search results
and	<i>forensic and evidence</i>	contain <i>forensic</i> and <i>evidence</i> . You may choose not to use "and" as the system automatically assumes a Boolean "and" between the search terms.
or	<i>autopsy or pathology</i>	contain <i>autopsy</i> or <i>pathology</i> , or both
w/n	<i>fire w/3 investigation</i>	contain <i>fire</i> within three words of <i>investigation</i>
and not	<i>forensic and not fingerprint</i>	contain <i>forensic</i> but not <i>fingerprint</i>

- Use wildcard symbols to find word variants.

Wildcard Symbols	Examples	Search results
?	wom?n	contain <i>woman</i> , <i>women</i> , etc.
*	techn* ap*ed *cip*	contain <i>technology</i> , <i>technological</i> , <i>technique</i> , etc. contain <i>applied</i> , <i>approved</i> , etc. contain <i>principle</i> , <i>participate</i> , etc.

- No special punctuation or commands are required to search for a phrase.
- Use parentheses to specify the order of Boolean operators, e.g. *forensic* and (*finger* or *glass*)
- Searches are case insensitive.
