## Search tips

Select **Browse** function to browse individual titles or to browse titles by subject.

Use quotation marks “ ” to search for a phrase. e.g. “Chinese language”.

Use **Boolean Operators** to combine multiple words/phrases:

Operator	Example	Finds
AND	sound <b>AND</b> pronunciation	records with both the words <i>sound</i> and <i>pronunciation</i>
OR	web <b>OR</b> internet	records with the word <i>web</i> or <i>internet</i> or both
NOT	French <b>NOT</b> Canadian	records with the word <i>French</i> but not <i>Canadian</i>

Use brackets ( ) to specify the order of the Boolean operators in your search statement. For example, *language and (Chinese or Japanese)*, the operator inside the brackets (or) is executed before the operators used outside the brackets (and).

- **Stem searching:**

Insert an \* (asterisk) at the end of a search term to find words that have a common root. For example, *translat\** returns translation, translator, translating, etc.
