

Save the date today to attend

The 14th International Conference on Nanostructured Materials

Conference focuses:

1. Nanostructure in High Entropy Alloys
2. Polymer, Organic and Other Soft Matter Materials
3. Nanomaterials for Energy and Environmental Applications
4. Bulk and Gradient Metallic Nanomaterials
5. Nanomaterials for Biomedical Applications
6. Frontiers in Nanostructure Stability: Glasses and Nanocrystalline Materials
7. Carbon Nanomaterials
8. Nanomechanics
9. Nanomaterials for Photonics and Optoelectronics

24 – 29 June, 2018
City University of Hong Kong

The year 2018 marks the 28th anniversary of the founding of the International Committee on Nanostructured Materials (ICNM) at a small nanomaterials conference in Atlantic City—the precursor to the biannual Nano Conference series.
