Master of Social Sciences in Sustainability and Development Studies

- What political and managerial skills are needed to address poverty and inequality?
- What financing and project management tools can be used to support sustainable development?
- What policy tools and instruments can be used to measure and calibrate sustainability performance?
- What skills and competencies are needed to integrate policies for poverty, inequality, and sustainability?
- What kinds of policies and practices characterize countries with rapid economic growth?
- What skills do policymakers and public managers need to operate in settings with high social and political change?
- How can policymakers and public managers address the impact of economic growth and industrialization on sustainability?
- Under what conditions can grassroots social and environmental movements succeed?

If you are interested in exploring these and related issues, the Master of Social Sciences in Sustainability and Development Studies is for you!

Featuring an innovative curriculum designed by leading scholars and practitioners, City University of Hong Kong's Master of Social Sciences in Sustainability and Development Studies allows students to:

- ✓ Critically engage major theories and debates in sustainability and development studies
- ✓ Explore the political economy of Asia in a comparative perspective
- ✓ Gain practical training amenable to a variety of career paths
- ✓ Gain hands-on training in policy advocacy and analysis
- ✓ Examine social and political foundations of development in Asia

The Master of Social Sciences in Sustainability and Development Studies provides students with an opportunity to gain skills and knowledge relevant to working in non-governmental organisations, government, international organisations, business and journalism.
