Display Functions of IP Phone System

To align with the University practice, the IP phone system at the Student Residence has already displayed the telephone number of incoming and outgoing calls. That means,

- 1) Users can see the phone numbers of the incoming callers; and
- 2) The phone numbers are disclosed to receivers. If users want to hide the calling numbers, please can add "133" before dialing.

The effective date of the number display is 3 August 2009.

Thanks you for your attention
