Keynote II
Cyber Youth Culture: At the Intersection of Technology and Humanity
Speaker: Ms. Wendy Dubit, Vergant Media, USA

Synopsis:
Unless our technological revolution brings us closer together, it will tear us further apart. Especially at the level of today’s youth, who, deprived of computer skills and access, will be unable to use these powerful tools of research and expression for school or work… and will unlikely ever catch up. The growing “Digital divide” between technology have and have-nots has become one of the most important issues in the U.S. today, and numerous initiatives have been established to assure that technology will benefit society and humanity as well as economy. This presentation will address some of the working models, and how similar programmes might work in Hong Kong.
