BEng Intelligent Manufacturing Engineering

工學士 (智能製造工程學)

• This major aims to develop the abilities of our students in engineering sciences, design innovations, automation and data analytics, so that these abilities can be applied to creating *smart manufacturing systems* in the *Industry 4.0* setting.

• Our graduates will possess the practical skills and knowledge for *innovating and managing the operations of modern manufacturing enterprises*.

• These skills and knowledge will also be applicable to service industries and commercial enterprises, *in automating and digitalizing their various business processes, to push for higher and higher efficiency.*
