

Professional learning and career development of university students and Experience sharing from Dr. Indu Singh

Date: 12 June 2017 (Mon)

Time: 11am -12 noon

Venue: Peter Ho Lecture Theatre (LT10), AC-1 Yeung Kin Man Academic Building.

Dr. Indu Singh is now working at the School of Medical Science, Griffith University, Gold Coast campus, as the Associate Professor. She developed and established the new Medical Laboratory Science program at the University which prepares graduate scientists to be work-ready for the rapidly changing and challenging environment in the field of science. Her expertise not only focuses on Educational Leadership, Curriculum Theory and Higher Education, Indu also has more than 30 years experience as a practicing scientist in clinical settings. In addition, Indu demonstrates her strength on the learning needs of her diverse student cohorts and the effectiveness of her teaching which is evident in the international recognition she received over the years, high student satisfaction and excellent graduate outcomes the program has achieved. This seminar will aim to give CityU's students a chance to make discoveries in a professional degree and also share the experiences in her professional career development.

All are welcome
