

# 5th Hong Kong International Oncology Symposium

## Date & Venue:

10th November 2018 (08:40 – 15:55) –

ClubONE, G/F, 12W, Hong Kong Science Park

11th November 2018 (08:20 – 17:30) –

Senate Room, 19/F, Lau Ming Wai Academic Building,  
City University of Hong Kong

The aim of the Hong Kong International Symposium is to bring together specialties and share the latest, high-impact biomedical innovations in order to establish a link between science, technology and clinical practice of cancer management. We attribute the success of the previous HKIOS to our efforts in establishing a premium event to gather intelligence that brings wide-ranging benefits to the oncology sector. With China's active development of Guangdong-Hong Kong-Macao Greater Bay Area as backdrop, the capacity and horizon of the 5th HKIOS will be larger and wider than before, and we are expecting to receive 500 registrations this year.

The HKIOS provides an international platform to gather world-class experts, keynote speakers and leading organizations, leveraging on their experience, innovative findings and recent breakthroughs in the field of precision oncology. The HKIOS always strives to attract participants from around the globe, including professions from North America, Europe, Japan, Southeast Asia, China and Hong Kong. The main themes of the 5th HKIOS are as follows:

- Innovative sequencing technologies (single-cell isolation and single molecule sequencing, gene editing, circulating tumour DNA)
- Application of artificial intelligence in clinical oncology, radiology and bioinformatics
- Tumor heterogeneity
- High precision radiotherapy
- Recent advances in clinical management of common cancers

Details of the event can be found at the Hong Kong Precision Oncology Society website, <https://www.hkpos.org>.

Organizer

5<sup>th</sup> HKIOS Organizing Committee

Co-organizers:

澳門中華醫學會

中國醫學科學院

Department of Biomedical Sciences, City University of Hong Kong

廣東省醫學科學院

Hong Kong Adventist Oncology Center (HKAOC)

Hong Kong College of Radiologists

Hong Kong Integrated Oncology Centre (HKIOC)

Hong Kong Science and Technology Parks (HKSTP)
