

Symposium on Advances in Regenerative Medicine and Tissue Engineering

Hosts: Department of Biomedical Sciences & Department of Infectious Diseases and Public Health

Date:	17 October 2023 (TUESDAY)
Time:	3:15 PM – 5:00 PM
Venue	CMA Lecture Theatre (Lecture Theatre15) 4/F, Yeung Kin Man Academic Building, CityU

Speakers

Harnessing mechanobiological domains to address tissue repair and disease treatment

Hae-Won Kim, PhD

**Director and Professor, Institute of Tissue Regeneration Engineering,
Dankook University, Korea
Editor-in-Chief of Journal of Tissue Engineering**

Therapeutic potential of 3D cardiac spheroids derived from human pluripotent stem cells for cardiac regeneration

Hun-Jun Park, MD, PhD

**Professor, Division of Cardiology, Department of Internal Medicine
The Catholic University of Korea, Seoul St. Mary's Hospital, Korea**

Bio-inspired tuning of natural polymers for 3D cell culture

Sun-Woong Kang, PhD

**Principal Researcher, Korea Institute of Toxicology, Korea
Assistant professor, University of Science & Technology, Korea**
