

**City University of Hong Kong
Course Syllabus**

**offered by Department of Electrical Engineering
with effect from Semester A in 2017/2018**

Part I Course Overview

Course Title:	<u>Applied Research Internship Scheme in Electronic Engineering</u>
Course Code:	<u>EE6691</u>
Course Duration:	<u>For full-time mode student only: 2 semesters/terms with possibility to extend for 1 more semester/term, (As set out in City University's Academic Regulations, Dissertation-type courses are not allowed to be repeated.)</u>
Credit Units:	<u>15</u>
Level:	<u>P6</u>
Medium of Instruction:	<u>English*</u>
Medium of Assessment:	<u>English</u>
Prerequisites: <i>(Course Code and Title)</i>	<u>Nil</u>
Precursors: <i>(Course Code and Title)</i>	<u>30 Credit Units of MSc elective courses; or equivalent</u>
Equivalent Courses: <i>(Course Code and Title)</i>	<u>Nil</u>
Exclusive Courses: <i>(Course Code and Title)</i>	<u>EE6680 Dissertation EE6680D Dissertation EE6690 Internship Scheme in electronic Industry</u>

- * Note 1:
Medium of daily interaction with research staff in the placement establishment is depending on the country of placement, however, English is the medium for assessments for both written and oral forms.

Part II Course Details

1. Abstract

The aim of the internship is to provide students with an opportunity to integrate and apply what has been learnt in the taught postgraduate, with experience through an applied research project in a research environment.

2. Course Intended Learning Outcomes (CILOs)

(CILOs state what the student is expected to be able to do at the end of the course according to a given standard of performance.)

No.	CILOs	Weighting (if applicable)	Discovery-enriched curriculum related learning outcomes (please tick where appropriate)		
			A1	A2	A3
1.	Organise and manage an individual research project in design, applied research, or development.		✓	✓	
2.	Demonstrate the ability to work independently with professionalism in successfully completing project assignments.		✓	✓	
3.	Demonstrate initiative, innovative and intellectual abilities in handling a technically challenging research project/assignment.		✓	✓	✓
4.	Disseminate results both in written form of a technical research report and published peer reviewed papers, and in an oral presentation.		✓	✓	✓
		100%			

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to self-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

3. Teaching and Learning Activities (TLAs)

(TLAs designed to facilitate students' achievement of the CILOs.)

TLA	Brief Description	CILO No.						Hours/week (if applicable)
		1	2	3	4			
Daily interaction and communication with staff in the designated establishment	On-going meetings and project discussions throughout the project cycle.	✓	✓	✓				
Keep a training log and perform daily research activities	Documentation of the project, technical paper reading, laboratory experiments, implementation and result evaluation	✓	✓	✓	✓			
Supervisory visits/discussions	CityU supervisors will meet with their students at regular intervals during placement period to discuss their training and provide advice if necessary.	✓	✓	✓				
Write a report and give a presentation	To summarize the learning and research outcomes during the internship training in a form of written report and presentation.	✓	✓	✓	✓			

4. Assessment Tasks/Activities (ATs)

(ATs are designed to assess how well the students achieve the CILOs.)

Assessment Tasks/Activities	CILO No.						Weighting	Remarks
	1	2	3	4				
Continuous Assessment: <u>100%</u>								
Log book, technical research report, published peer review paper (if any), project demonstration, final oral presentation	✓	✓	✓	✓			100%	
Examination: <u>0%</u> (duration: , if applicable)							100%	

Continuous Assessment: Coursework (100%)

The course work assessment is divided into two major components:

Internship Component (40%)

The assessment for the internship placement component is composed of log book, discussions/visits to obtain feedback from training establishment, presentation and demonstration in the training establishment.

Research Component (60%)

The assessment of research component is composed of technical research reports, published peer reviewed papers (if any), project demonstration, and final oral presentation.

The assessment of the project will be based upon the following components:

- (i) quality and content of research reports/papers
- (ii) performance in oral presentation

The assessment process will take the form of a technical report and an oral presentation together with a project demonstration, and will be carried out by an assessment panel appointed by Head of Department and comprised of a chairman, an assessor and the project supervisor. The Chairman will moderate the assessment process while the assessment panel will generate a single assessment mark for each project. In the event of a disagreement between supervisor and assessor on the assessment mark, the chairman shall arbitrate.

Note 2:

The internship placement can be either in local and overseas establishments, preferably in industrial companies or research-based laboratories attached to universities. Screening of the internship places similar to other internship schemes in the EE department will be performed in order to select qualified hosts. Each internship must have a well-defined project and schedule for the student. There are well established monitoring procedures to ensure the quality of internship. Company visits/interviews and log book checking are some of those procedures.

5. Assessment Rubrics

(Grading of student achievements is based on student performance in assessment tasks/activities with the following rubrics.)

Assessment Task	Criterion	Excellent (A+, A, A-)	Good (B+, B, B-)	Fair (C+, C, C-)	Marginal (D)	Failure (F)
Coursework	Achievements in CILOs	High	Significant	Moderate	Basic	Not even reaching marginal level

6. Constructive Alignment with Programme Outcomes

PILO	How the course contribute to the specific PILO(s)
1, 2, 3, 4, 5	The course provides students with ample opportunities in acquiring knowledge and know how in advanced technologies in the chosen areas of applied research internship.
6, 7	Students are required to complete a technical report, and demonstrate and present their research contribution in the selected topics. Students will also acquire project management skills and develop a sense of financial viability for the applied research project.
8	Students are required to complete an industrial research project which enables them to develop the ability to do academic/industrial research

Part III Other Information (more details can be provided separately in the teaching plan)

1. Keyword Syllabus

Nil

2. Reading List

2.1 Compulsory Readings

(Compulsory readings can include books, book chapters, or journal/magazine articles. There are also collections of e-books, e-journals available from the CityU Library.)

1.	Designated research/topical papers in the field of the project
----	--

2.2 Additional Readings

(Additional references for students to learn to expand their knowledge about the subject.)

1.	Designated research/topical papers in the field of the project
----	--
