

**City University of Hong Kong  
Course Syllabus**

**offered by Department of Media and Communication  
with effect from Semester A 2024/25**

---

---

**Part I Course Overview**

**Course Title:** Dynamic Web Communication

**Course Code:** COM5503

**Course Duration:** One Semester

**Credit Units:** 3

**Level:** P5

**Medium of Instruction:** English

**Medium of Assessment:** English

**Prerequisites:**

*(Course Code and Title)* Nil

**Precursors:**

*(Course Code and Title)* Nil

**Equivalent Courses:**

*(Course Code and Title)* Nil

**Exclusive Courses:**

*(Course Code and Title)* Nil

## Part II Course Details

### 1. Abstract

This course provides hands-on training on the retrieval, organization, and updating of online database for communication purposes. It provides opportunities for students to be exposed to a wide range of strategies and skills for the design, administration, and evaluation of interactive websites, including data structure and format, user interface, report generation, and security system. With the technical foundations built, the students are expected to develop conceptual and operational skills to discover and implement effective and innovative strategies of interactive communication.

### 2. Course Intended Learning Outcomes (CILOs)

(CILOs state what the student is expected to be able to do at the end of the course according to a given standard of performance.)

No.	CILOs	Weighting (if applicable)	Discovery-enriched curriculum related learning outcomes (please tick where appropriate)		
			A1	A2	A3
1.	Discover and evaluate the strengths and weaknesses of the existing approaches used in various communication industries to the storage, retrieval, delivery and administration of information for internal and external purposes.	25%	✓		
2.	Design innovative and dynamic (i.e., database-enabled) websites that include user interface, backend database, and other relevant components.	50%	✓	✓	
3.	Deploy and administrate dynamic websites with an emphasis on information content, user accounts, security mechanism, and other key issues.	25%	✓	✓	
		100%			

A1: Attitude

*Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.*

A2: Ability

*Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.*

A3: Accomplishments

*Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.*

### 3. Learning and Teaching Activities (LTAs)

(LTAs designed to facilitate students' achievement of the CILOs.)

LTA	Brief Description	CILO No.			Hours/week (if applicable)
		1	2	3	
Lectures	Lectures on the principles and concepts involved in database technologies and design	✓			1 (for 12 weeks)
Tutorials	Tutorials in which students will practice the skills involved in database design		✓	✓	1.5 (for 12 weeks)
In-class activities	In-class discussions and case studies	✓	✓	✓	0.5 (for 12 weeks)

### 4. Assessment Tasks/Activities (ATs)

(ATs are designed to assess how well the students achieve the CILOs.)

Assessment Tasks/Activities	CILO No.			Weighting	Remarks
	1	2	3		
Continuous Assessment: 100%					
Exercises	✓	✓		30%	
Website Construction		✓		50%	
Website Administration and Report			✓	20%	
Examination: NA					
				100%	

## 5. Assessment Rubrics

(Grading of student achievements is based on student performance in assessment tasks/activities with the following rubrics.)

Applicable to students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter

Assessment Task	Criterion	Excellent (A+, A, A-)	Good (B+, B, B-)	Fair (C+, C, C-)	Marginal (D)	Failure (F)
1. Exercises	Ability to demonstrate the mastering of programming and database design skills taught	High	Significant	Moderate	Basic	Not even reaching marginal levels
2. Website Construction	Ability to construct a website which demonstrates the understanding of principles of dynamic website and their applications	High	Significant	Moderate	Basic	Not even reaching marginal levels
3. Website Administration and Report	Ability to demonstrate the mastering of dynamic website management skills taught	High	Significant	Moderate	Basic	Not even reaching marginal levels

Applicable to students admitted from Semester A 2022/23 to Summer Term 2024

Assessment Task	Criterion	Excellent (A+, A, A-)	Good (B+, B)	Marginal (B-, C+, C)	Failure (F)
1. Exercises	Ability to demonstrate the mastering of programming and database design skills taught	Strong evidence of mastering the programming and database design skills taught	Adequate evidence of mastering the programming and database design skills taught	Some evidence of mastering the programming and database design skills taught	Fail to show evidence of mastering the programming and database design skills taught

2. Website Construction	Ability to construct a website which demonstrates the understanding of principles of dynamic website and their applications	Strong evidence of understanding the principles of dynamic website and their applications	Adequate evidence of understanding the principles of dynamic website and their applications	Some evidence of understanding the principles of dynamic website and their applications	Fail to show evidence of understanding the principles of dynamic website and their applications
3. Website Administration and Report	Ability to demonstrate the mastering of dynamic website management skills taught	Strong evidence of mastering the dynamic website management skills taught	Adequate evidence of mastering the dynamic website management skills taught	Some evidence of mastering the dynamic website management skills taught	Fail to show evidence of mastering the dynamic website management skills taught

More specific grading criteria for selected assessment tasks/activities are as follows:

Website construction:

- High relevance to communication needs in real life
- Informative and user-friendly interface
- Basic database-supported functionality (search, insert, update, deletion)
- Close integration between interface and database functions

Website administration and report:

- Detailed analysis of market needs and intended users
- Clear identification of central theme and specific features
- Practical plans for deployment, maintenance and update
- Through documentation of the design process

Weighting of the different criteria and other details will be given to the students during class.

**Part III Other Information** (more details can be provided separately in the teaching plan)

**1. Keyword Syllabus**

*(An indication of the key topics of the course.)*

Dynamic websites for communication, functions of online database in media industries, stand-alone versus networked database, information retrieval and organization, search strategies, data structure, user interface, user experience, user authentication, information security.

**2. Reading List**

**2.1 Compulsory Readings**

*(Compulsory readings can include books, book chapters, or journal/magazine articles. There are also collections of e-books, e-journals available from the CityU Library.)*

**2.2 Additional Readings**

*(Additional references for students to learn to expand their knowledge about the subject.)*

1.	Luke Welling and Laura Thomson, PHP and MySQL Web Development, 4/E
2.	HTML Tutorial <a href="http://www.w3schools.com/html/default.asp">http://www.w3schools.com/html/default.asp</a>
3.	Official PHP Manual <a href="http://php.net/manual/en/index.php">http://php.net/manual/en/index.php</a>
4.	PHP MySQL Database <a href="http://www.w3schools.com/php/php_mysql_intro.asp">http://www.w3schools.com/php/php_mysql_intro.asp</a>
