CS3356: MANAGING SOFTWARE PROJECTS

Effective Term
Semester A 2022/23

Part I Course Overview

Course Title
Managing Software Projects

Subject Code
CS - Computer Science

Course Number
3356

Academic Unit
Computer Science (CS)

College/School
College of Engineering (EG)

Course Duration
One Semester

Credit Units
3

Level
B1, B2, B3, B4 - Bachelor's Degree

Medium of Instruction
English

Medium of Assessment
English

Prerequisites
CS3342 Software Design or
CS3354 Software Engineering or equivalent

Precursors
Nil

Equivalent Courses
Nil

Additional Information
IS4500 Information Systems Project Management
IS4530 Project Management & Requirements Analysis
IS4532 Project Management and Outsourcing
Part II Course Details

Abstract
The course aims to introduce students to the principles behind the effective and successful management of software projects as well as tools, techniques and best practices. There are three main parts. One part is concerned with the project life cycle, processes and knowledge areas of the Project Management Framework as defined in “A Guide to the Project Management Body of Knowledge” (PMBOK) published by the Project Management Institute (PMI). The second part is concerned with the various soft skills required of a project manager, such as presentation skills, negotiation skills, interpersonal skills, people management skills, leadership skills, etc. The final part aims to expose students to highly realistic risk scenarios in which project managers need to prepare themselves for; issues that may involve hardware/software problems, to issues with clients/stakeholders, developers, budget, schedule, etc.

Course Intended Learning Outcomes (CILOs)

</tr>
</tbody>
</table>

A1: Attitude
Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability
Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments
Demonstrate accomplishment of discovery/innovation/creativity through producing/constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

Teaching and Learning Activities (TLAs)

### Case study/risk scenario analysis and discussion

To reinforce what is learned from the reading and lecture, students are given a weekly risk scenario/case. The scenario/case poses an IT project problem situation for students to propose a course of action to take, as well as precautionary actions that should have been taken to avoid or alleviate the problem in the first place. Students are required to do some online research as well as make appropriate references to the PMBOK in their proposal.

### Journal

As a learning and knowledge sharing tool, students are required to keep a weekly self-reflective journal to record their learning progress and useful insights as they progress through the course. The journal provides evidence to support the learning of software project management concepts and best practices.

### Presentation and case analysis

Students will be randomly selected to present their proposals for the risk scenarios/case. The instructor will guide and help focus discussions.

Examination (%)  
40

Examination Duration (Hours)  
2

Additional Information for ATs  
For a student to pass the course, at least 30% of the maximum mark for the examination must be obtained.

Assessment Rubrics (AR)

Assessment Task  
Class exercise and discussion

Criterion  
1.1 ABILITY to EXPLAIN and APPLY Project Management Framework for effective IT project management

Excellent (A+, A, A-)  
High

Good (B+, B, B-)  
Significant

Fair (C+, C, C-)  
Moderate

Marginal (D)  
Basic

Failure (F)  
Not even reaching marginal levels

Assessment Task  
Self-reflective journal and discussion

Criterion  
2.1 ABILITY to EXPLAIN the important soft skills and APPLY the skills for effective IT project management

Excellent (A+, A, A-)  
High

Good (B+, B, B-)  
Significant

Fair (C+, C, C-)  
Moderate

Marginal (D)  
Basic

Failure (F)  
Not even reaching marginal levels
Assessment Task
3. Quiz

Criterion
3.1 ABILITY to APPLY the Project Management Framework and soft skills for effective IT project management

Excellent (A+, A, A-)
High

Good (B+, B, B-)
Significant

Fair (C+, C, C-)
Moderate

Marginal (D)
Basic

Failure (F)
Not even reaching marginal levels

Assessment Task
Risk scenario/case analysis report/presentation

Criterion
4.1 ABILITY to APPLY the Project Management Framework and soft skills for solving risk scenario problems

Excellent (A+, A, A-)
High

Good (B+, B, B-)
Significant

Fair (C+, C, C-)
Moderate

Marginal (D)
Basic

Failure (F)
Not even reaching marginal levels

Assessment Task
Examination

Criterion
5.1 ABILITY to EXPLAIN and APPLY Project Management Framework for effective IT project management

Excellent (A+, A, A-)
High
Part III Other Information

Keyword Syllabus

Syllabus

• Overview
  Overview of the project management discipline; software system versus software project; system development life cycle; roles and responsibilities of the project manager, ethics of software project management; PMI; PMBOK
• The Project Management Framework
  The chapters of the PMBOK – integration management, scope management, time management, cost management, quality management, human resource management, communication management, risk management, procurement management, etc
• Project Management Soft Skills
  Presentation skills, managing time, managing meetings, managing people, managing team, doing interviews, interpersonal communication skills, problem solving skills, etc
• Worst Case Scenarios/Case Studies
  Examples: "How to Give a Last Minute Project Status Presentation", "How to Convince Others, and Yourself, that the Software will be Delivered on Time", "How to Keep the Project Going After Your Key Developer Suddenly Quits", "What to Do When a New Technology Fails", "How to Convince Others, and Yourself, that the Software will be Absolutely Safe", "What to Do When the Customer Insists that You Add a New Feature", etc.
