SDSC3002: DATA MINING

Effective Term
Semester B 2023/24

Part I Course Overview

Course Title
Data Mining

Subject Code
SDSC - School of Data Science

Course Number
3002

Academic Unit
School of Data Science (DS)

College/School
School of Data Science (DS)

Course Duration
One Semester

Credit Units
3

Level
B1, B2, B3, B4 - Bachelor's Degree

Medium of Instruction
English

Medium of Assessment
English

Prerequisites
MA2506 Probability and Statistics or MA2510 Probability and Statistics

Precursors
Nil

Equivalent Courses
Nil

Exclusive Courses
Nil

Part II Course Details

Abstract
Data mining is about the extraction of non-trivial, implicit, previously unknown and potentially useful principles, patterns or knowledge from massive amount of data. This course introduces the foundation of data mining techniques, including
basic concepts of data representation, new software stack for processing massive data such as MapReduce and Spark, and popular data mining tasks like mining frequent itemsets, nearest neighbor search, clustering analysis and graph mining. Students will also learn how data mining techniques are used in real-world applications such as online advertising and recommender systems.

Course Intended Learning Outcomes (CILOs)

<table>
<thead>
<tr>
<th>CILOs</th>
<th>Weighting (if app.)</th>
<th>DEC-A1</th>
<th>DEC-A2</th>
<th>DEC-A3</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Understand the abstract representation of data, such as vectors, matrices, sets and graphs, with modelling considerations, for use in downstream applications</td>
<td>10</td>
<td>x</td>
<td></td>
</tr>
<tr>
<td>2</td>
<td>Familiarize classical data mining methods such as pattern mining, classification, dimensionality reduction and clustering</td>
<td>30</td>
<td>x</td>
<td>x</td>
</tr>
<tr>
<td>3</td>
<td>Implement scalable algorithms to conduct data mining tasks</td>
<td>30</td>
<td>x</td>
<td>x</td>
</tr>
<tr>
<td>4</td>
<td>Demonstrate the ability of working with other students on projects addressing challenging problems from real-world data mining applications</td>
<td>30</td>
<td>x</td>
<td>x</td>
</tr>
</tbody>
</table>

A1: Attitude
Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability
Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments
Demonstrate accomplishment of discovery/innovation/creativity through producing/constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

Teaching and Learning Activities (TLAs)

<table>
<thead>
<tr>
<th>TLAs</th>
<th>Brief Description</th>
<th>CILO No.</th>
<th>Hours/week (if applicable)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Lecture</td>
<td>1, 2, 3, 4</td>
<td>3 hours/week</td>
</tr>
<tr>
<td>2</td>
<td>Tutorial</td>
<td>3, 4</td>
<td>6 hours/semester, included in lecture time</td>
</tr>
</tbody>
</table>

Assessment Tasks / Activities (ATs)

<table>
<thead>
<tr>

<th>CILO No.</th>
<th>Weighting (%)</th>
<th>Remarks (e.g. Parameter for GenAI use)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Assignments</td>
<td>1, 2, 3, 4</td>
<td>40</td>
</tr>
<tr>
<td>2</td>
<td>Project</td>
<td>2, 3, 4</td>
<td>30</td>
</tr>
</tbody>
</table>

Continuous Assessment (%) 70
Examination (%) 
30 

Examination Duration (Hours) 
2 

Additional Information for ATs 
Note: To pass the course, apart from obtaining a minimum of 40% in the overall mark, a student must also obtain a minimum mark of 30% in both continuous assessment and examination components. 

Assessment Rubrics (AR) 

Assessment Task 
Coursework 

Criterion 
Assignment, Participation, Project presentation and report 

Excellent (A+, A, A-) 
High 

Good (B+, B, B-) 
Significant 

Fair (C+, C, C-) 
Moderate 

Marginal (D) 
Basic 

Failure (F) 
Not even reaching marginal levels 

Assessment Task 
Examination 

Criterion 
Open-book and notes exam 

Excellent (A+, A, A-) 
High 

Good (B+, B, B-) 
Significant 

Fair (C+, C, C-) 
Moderate 

Marginal (D) 
Basic 

Failure (F) 
Not even reaching marginal levels
Additional Information for AR
Examination, test, continuous assessment and laboratory reports will be numerically-marked.

Part III Other Information

Keyword Syllabus
Introduction to Data Mining: data representation; data mining tasks; overlaps with machine learning, database systems and theoretical computer science; new computing software like MapReduce and Spark.
Itemset Mining: market-basket model; frequent itemsets; A-priori algorithms; sampling-based frequent itemset mining algorithms; association rules.
Similarity/Distance between data points: nearest neighbor search; Minhashing algorithm; locality sensitive hashing; dimensionality reduction; principle component analysis; random projections.
Clustering: k-means algorithm; hierarchical clustering; density-based clustering; spectral clustering; graph Laplacian matrix.
Graph Analysis: graph centrality measures; PageRank; hubs and authorities in networks; stochastic diffusion models; Markov chains and random walks; graph representation learning; link prediction.
Applications: online advertising; the matching problem; recommender systems; matrix factorization; collaborative filtering; social network mining; community detection and graph partition; network sampling.
