Tel: 38417210

Introduction: Machine learning, NLP and predictive analytics can make huge, complex data sets more meaningful, and are incorporated into our daily research and investment process. We aim to apply ML algorithms with historical transactions and other market data to search for best investment opportunities.

We aim to develop China Bond Intelligence (CABI) with Big Data and Machine Learning algorithms. CABI will allows users to trade with managed risks in China’s bond market being efficient and fast.
