Job Description

We are looking for experienced talents to develop 3D/multimedia/mobile/web/VR/AR software, apps, contents and campaign for our projects. We are continually building innovative new technologies like VR/AR and deploying interactive solutions for our customers.

You will work closely with the system delivery team assisting in mobile web/apps design and development across multiple platforms for examples Windows, Android, iOS and mobile web. You will also collaborate with cross-functional teams throughout the design process to provide creative ideas and inspiration in UI/UX design and participate to develop simple, easy-to-use, and intuitive mobile apps/web.

Our team members are dedicated designers, developers and deliverers of specialized training, simulation, graphics, and 3D modeling. Our goal is to introduce and transition our diverse customer base to the next generation through the adaptation of our innovative products. Commitment to the production of sophisticated designs and high-quality products are essential to successful employment. If you are looking for a new challenge, kindly send your CV to Ching at info@mosaicdigi.com. We welcome you to apply!

Requirement

- Up-to-date with the latest trends and technologies, familiar with IT devices set up and fast learner with a passion in programme development.
- Passion for developing professional game features to meet customer and industry needs Proficient in both spoken and written Chinese and English.
- Have good interpersonal and communication skills, innovative, self-initiating, eager to learn, hardworking, able to work under pressure and work independently.
- Strong sense of responsibility in your work, self-motivated, attentive to detail, creative & well organized as a team player.
- Ability to multi-task, work independently and meet demanding timelines.
- Able to take initiative and pay close attention to detail.
- Fresh graduates are welcome.
- Immediate availability is preferred.
- Professional portfolio is required for internal review.

UI/ UX Designer

The Job

- Create user interface and user experience sketches, prototype, concept models and detail schematics and wireframe for desktop and mobile
- Create flow diagrams/charts, storyboard and design mock-up
- Design user interface to ensure ease of use of applications
- Perform user testing and other activities to gain customer behavior and feedbacks from end users
- Translate concepts into wireframes and mockups that lead to intuitive user experiences.
- Facilitate internal and external clients' product visions by researching, conceiving, wireframing, sketching, prototyping, and mocking up user experiences for digital products.
- Design and deliver wireframes, user stories, user journeys, mockups optimized for a wide range of devices and interfaces, information architecture schematics and UI functional specification.
- Identify design problems and develop the most efficient solutions with clear understanding of business goals and user behavior.
- Collaborate with other team members and stakeholders, including product managers, project managers, application developers, quality assurance team, etc.

The Person

- Diploma or above in interactive design, multimedia, web design or any related disciplines
- Proficient in Adobe XD, Sketch, Wire Framing tools (OmniGraffle) or equivalent
- Passion for user experience through clean interaction and visual design
- Higher Diploma or above in Graphic Design, Multimedia Design or related discipline
- Knowledge of HTML5 and CSS3 is a plus.
