

## About Us

Commvest Asia is an R&D engineering company providing bespoke technical assistance on computer vision and geo-spatial technology development for R&D institutes.

## Job Description

We are now looking for summer interns to join our team in Hong Kong for a duration of 2-3 months.

You will be working on one of our AI computer vision projects involving object detection and segmentation. You will be responsible for building up data architectures, designing statistical models, and supporting the technology model development process, from concept, testing to release.

## Job Functions

- Use machine learning and advanced statistics to research and build computer vision solutions for real-life business problems
- Design data architectures to fulfil optimisation and utilization needs of the business
- Implement and deliver the end-to-end data pipeline from data collection, transformation, modelling to visualisation
- Support the model development through data mapping, labelling, and testing
- Work closely with the founder and team from day one to identify streaming AI technologies and validate the product
- All this plus great working culture!

## Job Requirements

- University student in Computer Science, Statistics, Mathematics, Engineering, Data Science or a related analytical field.
- Passionate about data, AI and technology
- Can-do attitude; willingness to drive projects to completion
- Good command in both Cantonese and English
- With either of the following requirement will be preferred:
  1. Understanding on AI and machine learning framework, such as Tensorflow, Keras, Scikitlearn or Pytorch, and experience in Python is a plus
  2. Understanding on database such as SQL server and MySQL is a plus

## Benefits

- Competitive salary package (\$10,500/month)
- Young and energetic team with relaxed dress code

If you're ready to tap into your potential and build something impactful, this is the team for you!
