About The Role

Please only submit one application, our Recruitment team will consider you for all other relevant open Graduate Programmes we are hiring for.

There are thousands of graduates in the market, stand out from the crowd.

Technology is transforming all our lives – developments in robotics, automation, artificial intelligence and big data are creating the careers of the future. Digital careers need intelligent, analytical minds, people who want to make a difference; graduates who desire to be at the forefront of change.

Regardless of your degree subject, we believe all graduates possess the skills to fuel an exciting career in technology. FDM offers numerous career paths for you to choose, and that’s why in 2018, we launched the careers of over 2,000 graduates. FDM Group is a FTSE 250 employer with a global footprint working with some of the largest blue-chip organisations including major banks based in Hong Kong!

How is the program structured?

Your journey as a Business Intelligence Consultant will begin at FDM’s academy in Hong Kong, where you will receive fully-funded training and the chance to gain industry recognised qualifications, as well as mentoring and support throughout. Our award-winning Graduate Programme provides a wealth of opportunity to gain transferable skills as well as becoming an expert within your field. After successfully completing your training, you will work with one or more of our clients in Hong Kong during the two-year programme.

What will I be doing?

FDM’s Business Intelligence Graduate Programme will train you to become an expert at developing strategies to help businesses gain and maintain competitive advantage through the use of data. You will learn how to design and develop analytics tools and platforms to analyse data essential to ensuring that businesses function efficiently. Business Intelligence technologies provide historical, current and predictive views of business operations with the aim of creating a simpler interpretation of big data, identify opportunities and improve strategies for long-term organisational stability.
