About The Role

Please only submit one application, our Recruitment team will consider you for all other relevant open Graduate Programmes we are hiring for.

As part of the FDM Data Engineering Graduate Programme you will receive 11 weeks of industry relevant training covering diverse languages including SQL, Hive QL, Python and Spark. You will learn how to process massive amounts of data, create data flows, manage data lakes, design real time streaming and batch type data ingestion pipelines. We will guide you in how to manage advanced tools and frameworks as well as solve various data problems. Upon training completion through the Hong Kong Academy, you will become an FDM Consultant and will start working with one or more of our global clients for a period of two years.

You will be involved in exciting projects covering high volumes of data sets, transformations, business requirements, geographies and stakeholders. As a Data Engineer, you will have a crucial role in designing and creating data-centric scalable solutions, vital to helping organisations understand their data and facilitate growth. Some of your responsibilities will include checking that overnight data exports, transformations and imports have ran to schedule and any broken problems are fixed, managing and processing huge databases and becoming an expert in distributed data storage and computing frameworks.

Reasons why FDM is for you:

- Commercially relevant training, covering both technical and professional skills, to ensure you are business ready
- Opportunities to achieve industry recognised qualifications
- Opportunity to work with our market leading clients across Hong Kong as part of their integrated teams
- Comprehensive support and development programme throughout your entire FDM career journey including continued professional development, mentoring and networking events

About You

- Bachelor’s degree preferably in STEM (Data Science, Information Systems, Analytics, Engineering, or other related disciplines)
- Able to commit to the two-year consultant programme with FDM
- Basic knowledge in any programming languages (e.g., Python, Java, C++, R, Matlab, etc.)
- Strong problem solving and analytical skills
- Excellent interpersonal skills and communication in English (Cantonese would be a plus)
- Eligibility to work in Hong Kong
About Us
Our Culture

With 95+ nationalities working together as a team, FDM is a company committed to diversity and inclusion, in terms of background, culture and skills. We celebrate difference because we want everyone to have equal opportunity to belong and grow in their career. We are active in creating a more gender-balanced workforce, with circa 33% of our senior management team and 31% of all employees identifying as female.

Diversity and inclusion are at the heart of what we value as an organisation. FDM Group is an equal opportunities employer and all qualified applicants will receive consideration for employment without regard to race, religion, sex, sexual orientation, age, disability or any other status protected by law. Our recruitment team are happy to support with any reasonable adjustments that are needed within the recruitment process.

An opportunity like this is rare and if you think you can see the potential, do not think about it too long! We help people like you make their first step into tech every day. Are you ready to make yours?
