About The Role

Please only submit one application, our Recruitment team will consider you for all other relevant open Graduate Programmes we are hiring for.

Do you thrive in fast-paced technical environments and have a strong attention to detail? Are you eager to have a career where you are encouraged to meet your potential? Does the opportunity to work for a prestigious company with an impressive global presence excite you?

Get ahead of the crowd and secure a dynamic, challenging and rewarding career in tech starting ASAP!

We are currently seeking candidates interested in building a career within Software Development. Our Graduate Programme will provide you with a highly sought-after skill set and experience in a technical role where you’ll develop high levels of expertise, opening up an exciting variety of future career paths.

What FDM has in store for you:

We welcome applicants from all degree backgrounds. All you need is the drive and passion for building an exciting and dynamic career in the world’s fastest growing industry. FDM’s award-winning training will equip you with the skills you need to excel.

A career in Software Development suits those who enjoy applying their technical and creative minds to real-world software problems. In your role you will gain invaluable hands-on experience working on the latest technologies while helping our clients design and build software solutions. You will learn to create code that is modular, robust, scalable, and maintainable to a professional standard. Your responsibilities will involve ensuring that programmes and applications are working effectively and meeting all technical and business requirements.

What we offer you:

- A full-time contract with a salary from Day 1 of training
- Training is provided by industry experts, covering both technical and professional skills to ensure you are job-ready
- Ongoing career support throughout your entire FDM journey, including professional development, mentoring, and social networking events with a community of peers
- A chance to launch a career in one of the most in-demand tech fields

About You

- Bachelor’s degree preferably in STEM related field or other related disciplines
- Able to commit to the two-year consultant programme with FDM
- Basic knowledge in any programming languages (e.g. Java, Python, C++, etc)
- Strong problem solving and analytical skills; Ability to work within fast-paced environment
- Excellent interpersonal skills and communication in English (Cantonese would be a plus)
- Eligibility to work in Hong Kong

There has never been a better time to start a career in tech – Apply Now!
