

**ARE YOU READY  
FOR AN INNOVATIVE,  
FAST-GROWING  
ENVIRONMENT?**

Connect your career with Equinix

**Equinix (NASDAQ: EQIX)** is one of the fastest growing data center companies, growing connectivity between clients worldwide. That's why we're always looking for creative and forward-thinking people who can help us achieve our goal of global interconnection. With 200 data centers in over 24 countries spanning across 5 continents, we are home to the Cloud, supporting over 1,000 Cloud and IT services companies that are directly engaged in technological innovation and development. We are passionate about further evolving the specific areas of software development, software and network architecture, network operations and complex cloud and application solutions.

At Equinix, we make the internet work faster, better, and more reliably. We hire talented people who flourish with solving hard problems and give them opportunities to hone new skills, try new approaches, and grow in new directions.

**Graduate IBX Field Engineer** is a foundation position in the Field Engineer 1-2-3 Skills Development program. The Field Engineer works closely with Facility Operations team and Implementation team to maintain day-to-day operation support to EQUINIX Data Centre. In the EQUINIX Career Pathways, you will develop your own growth plan by on-the-job experiences, learning from others and formal training to achieve your career short term and long term aspirations.

What you will do :

- Technical Support services - Data Centre operations and service provisioning
- Manage MMR expansion projects
- Manage multiple concurrent interdisciplinary projects
- Customer connectivity service, including circuit testing and labelling
- Cross connect related audit duties, record validation & housekeeping work
- Local networking devices (Cisco / Juniper / Brocade / H3C)
- Incident handling, problem troubleshooting and reporting
- Pre-sales support to Sales and Customer Service team

Our culture is at the heart of our success and it's our authentic, humble, gritty people who build The Magic of Equinix. We share a real passion for winning and put the customer at the center of everything we do.

What we are looking for :

- Universities graduated in Computing Science/ Information System/ Information Technology or other disciplines
- Excellent interpersonal, presentation and problem-solving skills
- Self-motivate, customer-orientated attitude
- Good command of spoken and written English

EQUINIX offers attractive salary, performance bonus and fringe benefit, voluntary services day-off to the right talents. Submit your application now to **Join\_us@ap.equinix.com**
