

Junior Project Engineer

Company background:

Mekoprint is a high technology Danish manufacturing company who assist and work together with customers in developing the best interface solutions for customers in segments such as: medical devices, automation, industrial machines and general HMI projects. We are customer-centric and advise on material selection, new product possibilities and cost improvements to ensure our customers get exactly what they need. Our headquarters and main production is in Denmark, with a focus on high-volume printed electronics, touch-screen integration and advanced user interfaces. Besides production in the main headquarters in Denmark, Mekoprint has production in several countries in Europe and Asia through own subsidiaries and long term partners. Mekoprint Hong Kong Ltd. was established in 2012 in order to handle logistics and services for partner-suppliers and customers in both Asia and Europe and is located in Hong Kong Science and Technology Park.

Job introduction:

Would you like to join - a leading and ambitious international company - and create the best customized user interface solutions for quality conscious European and Global customers?

Mekoprint is offering a Junior Engineering role based in our Hong Kong Science Park office working in close collaboration with local colleagues, manufacturing partners in Asia and our User Interface specialists in Denmark. We engineer, manufacture or source customized HMI-solutions, such as membrane switches, high-end silicon rubber keypads, capacitive keyboards and integrated touch screen solutions. We have high-end sheet and roll-to-roll manufacturing in Denmark and partner based production in China and Taiwan. Mekoprint Hong Kong develops customized HMI solutions and handles the daily business and relationship with our manufacturing partners in Asia.

Job responsibilities:

- Analyze and understand customer needs in their HMI solution
- Provide solutions concerning look & feel, materials, quality and cost requirements
- Ensure project handling from initial customer request to delivery
- Close communication with colleagues in Hong Kong and Denmark as well as manufacturing partners in Asia
- Professional handling of HMI projects including drawing details, data handling, quotations, etc.
- Ad hoc office and project management tasks

Desired skills and experience:

- Fluently English speaking and writing. Mandarin is a plus.
- Engineering background or degree with basic knowledge of different manufacturing processes and materials
- Experience with or knowledge of product design software, AutoCAD and ERP systems is an advantage
- Knowledge of electrical design and electronic components is a plus
- Technical knowledge of products (membrane keyboards, silicon rubber keypads, PCB or FPC experience a plus but not a must)
- Strong communication and relationship building skills
- Able to work independently as well as in teams
- You will be a part of a small team, so some job flexibility is required

- Willing to travel (Asia and EU)

We offer 5 day working week, flexible hours, and medical insurance. Please forward your application including CV, cover letter, expected salary, starting date etc. to sko@mekoprint.com – applications will be reviewed on an ongoing basis. We regret that only shortlisted candidates will be notified, within 2 weeks from receipt of application. Personal data collected will be used for recruitment purposes only.
