Installation Guide for Clients using Windows 7 and WPA/WPA2 security technology

This manual helps you set up your notebook computer to access the Internet via the CityU Wireless LAN service. You should have the following items:

- Windows 7 installed in the notebook computer
- Built-in or an external wireless network interface card (IEEE 802.11a, b, g or n compatible)
- Network connection password

Step 1: Wireless Network Card Installation

a) If your computer has a built-in WLAN card, the bundled Windows 7 should recognize it and you may skip to step 2.

b) If you are using an external WLAN card, you can insert your WLAN interface card into the computer.

c) Turn on the computer and Windows 7 will detect the card and install the driver automatically.

If you are using a WLAN card that is not recognized and supported by Windows 7 natively, you may install the driver manually. Please follow the steps described in the installation guide that comes with your WLAN card.

Step 2: Connecting to CityU WLAN

a) Click the "Wireless Network" icon in the System Tray to list the available wireless network in range, select "CityU WLAN (WPA)" and then click the "Connect" button to establish connection.
b) Wait until you see the logon window to prompt you for the login name and password. Enter your EID and network connection password to login.

The Windows Security Alert window will be displayed. Click the “Details” button to check whether you get any one of the following combination:

1) Radius Server: ciias.ad.cityu.edu.hk
   Root CA: Entrust.net Secure Server Certification Authority

2) Radius Server: ciias.ad.cityu.edu.hk
   Root CA: DigiCert High Assurance EV Root CA

3) Radius Server: ciiss1.ad.cityu.edu.hk
Example:

Press "Connect" if the information shown is correct, otherwise you may properly connect to a rogue/unknown server and you should terminate the connection immediately.

c) You can now access the Internet upon successful logon.

Security Alert

By default, your credentials (user name and password) are automatically stored in the computer for later use. Hence, the computer will not ask for your credentials the next time when you are connecting to the "CityU WLAN (WPA)". If you want to be prompted for the credentials every time when establishing the connection, please follow the steps below as such your credentials will not be stored.

a) Open Network and Sharing Centre
b) Select “Manage wireless network”

c) Right click the “CityU WLAN (WPA)” network and then select the “Properties”

d) In the “Security” tag, uncheck the “Remember my credentials for this connection each time I'm logged on” option and then press “OK” button to save your settings.
