Turning on the System

Press the “System On” button.

Please wait while the system starts up

After pressing “System On”, you need to wait for few seconds for equipment warm-up.
Displaying the PC

1. Press the “PC” button.
2. Turn on the desktop computer.
3. Select the projector
4. Wait for 30 seconds for projector warm-up.
Displaying the Laptop

1. Connect the VGA cable to your Laptop Computer.

2. Connect the audio cable (3.5mm mini-jack plug) to your Laptop Computer if you have audio association with the presentation material.

3. Press the “Laptop” button.

4. Press “Fn” + “CRT / LCD” on the laptop to send image to projector. (apply to most of the laptop models, if failed, confirm with your laptop user manual)

5. Select the projector

6. Wait for 30 seconds for projector warm up.
Using the Doc-Cam (Visualizer)

1. Press the “Doc-Cam” button.
2. Select the projector
3. Place the object / document / transparency onto the Doc-Cam (Visualizer).
4. Adjust the viewing area by rotating the zoom log **Clockwise & Anti-Clockwise**, and press the Auto Focus button [AF] for focusing.
5. Wait for **30 seconds** for projector warm-up.

*Please refer to the “Doc-Cam (Visualizer)-Operation Guide” for more details.*
Using the DVD Player

1. Press the “DVD” button.
2. Select the projector
3. Press “DVD Control” to control the DVD Player.
4. Open / Close the Disc Tray.
5. Place the disc on the disc tray.
6. Press the “PLAY” button to start playback.
7. Wait for 30 seconds for projector warm-up.
8. After use, press the “STOP” button, the playing Disc will stop.
Using the External Input / Auxiliary Input

1. Connect the AV cables to the output of your device.
2. Press the “Aux” button.
3. Select the projector
4. Wait for 30 seconds for projector warm-up.
Others

Adjusting the Volume Up / Down
Mute / Unmute the Projection
Controlling the Projector
Controlling the Room Lighting & Screen
Shutdown the System

1. Press the “System Off” button.

2. Press the “Yes” button.
   System is shutting down.

*For energy saving, please always shut down the system when not in use, Thanks!*
Setting Up

1. Raise the camera column. The lamp column is raised at the same time.

2. Rotate the camera head.

3. Adjust the lamp column and lamp head to a suitable position, as shown in the illustration on the right.
