Turning on the System

Press the “System On” button.

After pressing “System On”, you need to wait for few seconds for equipment warm-up.
Displaying the PC

1. Press the “PC” button.
2. Turn on the desktop computer.
3. Wait for 30 seconds for projector warm-up.
Displaying the Laptop

1. Connect the **VGA cable** to your Laptop Computer.

2. Connect the **audio cable** (3.5mm mini-jack plug) to your Laptop Computer if you have audio associated with the presentation material.

3. Press the **“Laptop”** button.

4. Press **“Fn” + “CRT / LCD”** on the laptop to send image to projector. (apply to most of the laptop models, if failed, confirm with your laptop user manual)

5. Wait for **30 seconds** for projector warm-up.
Using the Doc-Cam (Visualizer)

1. Press the “Doc-Cam” button.

2. Place the object / document / transparency onto the Doc-Cam (Visualizer).

3. Adjust the viewing area by rotating the zoom log Clockwise & Anti-Clockwise, and press the Auto Focus button [AF] for focusing.

4. Wait for 30 seconds for projector warm-up.

*Please refer to the “Doc-Cam (Visualizer)-Operation Guide” for more details.*
Using the DVD Player

1. Press the “DVD” button.
2. Press “DVD Control” to control the DVD Player.
3. Open / Close the Disc Tray.
4. Place the disc on the disc tray.
5. Press the “PLAY” button to start play back.
6. Wait for 30 seconds for projector warm-up.
7. After use, press the “STOP” button, the playing Disc will stop.
Using the External Input / Auxiliary Input

1. Connect the **AV cables** to the output of your device.
2. Press the “**Aux**” button.
3. Wait for **30 seconds** for projector warm-up.
Others

- Adjusting the Volume Up / Down
- Mute / Unmute the Projection
  - Controlling the Projector
  - Controlling the Room Lighting & Screen
Shutdown the System

1 — Press the **“System Off”** button.

2 — Press the **“Yes”** button.

— System is shutting down.

*For energy saving, please always shut down the system when not in use, Thanks!*
