Striving for a Sustainable Environment: Innovative Approaches in Tackling Crimes against the Environment

Project Number: 6000597

Principal Investigator: Dr. Rebecca Wing Yee WONG

Grant Type: TSG

Abstract:

In this course, students will be exposed to theoretical frameworks in understanding crimes against the environment and its prevention. In line with principles of Discovery Enriched Curriculum (DEC), students will be exposed to in-depth knowledge of green crimes and its prevention.

As part of their assessment, students will design and produce a video clip to promote awareness for prevention of crimes against the environment and wildlife. It is proposed that the video clips will be hosted on an online forum for reference and an outstanding video clips (selected by a panel of teaching staff from SS) will be selected to enter into contests hosted by the University (CLASS DEC Award).
