4. Q & A
Defining Your Dream - 1

- Start by asking yourself what makes you happy, reference to some of your role models
- Create a personal mission statement. Think out of the box - disruptive
ROLE
MODEL

https://youtu.be/slp3-dPKlEM

https://youtu.be/yg3hSXfhYSk
• **Re-examine your past goals** Try to let feeling of guilt, shame, or regret go – you are entering a new chapter of your life and it is important to examine your past experiences so that you **don’t repeat** them. But it is also important to reflect on what **your strengths** have been in the past so that you can make them work for you **in the future**.

• **Consider what you can and can’t control.** You can’t control the actions of others that might get in the way of your dream. And you can’t control the universe as a whole. **Try to define some of the things about achieving your dream**
• Reflect and then write out your dream as a manageable goal. Take a look at everything you have done – your happiness list, mission statement, learnings from the past, and vision board. Now begin to craft a simple and clear goal from these materials. Try to define your dream in simple terms, using just one sentence.
Accomplishing Your Dream - 1

• Break your dream down into manageable "project"
• Find out how others have accomplished your goal. Do some research to find out how other people have achieved the same dream. The goal must be customer driven.
• Define the steps for each "project.
• Commit to your dream by taking action on each "project"
• Always think ahead what’s next action on your list
Accomplishing Your Dream - 2

• Use your missteps as a lesson. Learn from your mistakes and keep on going.

• Be inspired and learnt from others. Seek out the people who have achieved their dreams and talk with them or read their stories. Understand there are some uncontrollable circumstances such as politics, change of government policy, natural disasters, currency rate...

• 360 Appreciation Management - encourage and awarding the working team (your share holders, your partner, your subordinates) help them to success their dream and wishes. Don't go with your dream only U. Building up leadership and alliance power! Team work and full employee support is the key success factor.
