

City University of Hong Kong

**Information on a Course
offered by Department of Applied Social Sciences
with effect from Semester A in 2014/2015**

Part I

Course Title:	Human Behaviour and Diversity
Course Code:	SS5212
Course Duration:	One Semester
No. of Credit Units:	3
Level:	P5
Medium of Instruction:	English
Medium of Assessment:	English
Prerequisites:	Nil
Precursors:	Nil
Equivalent Courses:	Nil
Exclusive Courses:	Nil

Part II

1. Course Aims

This course provides knowledge and understanding, and its application to practice issues of human development and social functioning at the individual, small group, and community/organizational/societal levels. Through the use of both theory and research findings, students explore the complex interrelatedness of individuals and the various systems that comprise their social environment. Particular emphasis is placed on understanding how human diversity, such as race, ethnicity, culture, gender, and socioeconomic factors contribute to and influence personal development and the social functioning of individuals and family systems across life span. Implications for social work practice, and especially for relationship building, are drawn from the process.

This course introduces students to:

1. explain both the traditional and alternative theoretical perspectives and empirical foundations used to understand human development and behaviour;
2. identify the biological, psychological, and social systems that influence development for each age group;
3. describe normal developmental tasks and milestones for each age group;
4. understand and describe the interaction between the predisposition's of the individual and the constraints and/or support of the social environment as an essential element in the human development process;
5. discuss, as appropriate, the differential effects of class, ethnicity, gender, culture, and sexual orientation in the human development process, particularly as it influences our understanding of the both traditional and alternative theoretical perspectives for social work practice.

2. Course Intended Learning Outcomes (CILOs)

Upon successful completion of this course, students should be able to:

No.	CILOs	Weighting
1.	Explain human growth and development taking into account the interactions of biological, psychological, emotional, and social factors;	20%
2.	apply concepts of growth and development within the context of a multi-layered, dynamic environment;	25%
3.	demonstrate an explicit understanding of principles of critical thoughts, and the ability to reflect on issues and/or theories systematically;	25%
4.	evaluate an ethical issue and present a solution in a systematic way;	15%
5.	Recognize the importance of human diversity and its implications for social work practice	15%

3. Teaching and Learning Activities (TLAs)

(Indicative of likely activities and tasks designed to facilitate students' achievement of the CILOs. Final details will be provided to students in their first week of attendance in this course)

CILO No.	TLA1	TLA2	TLA3	TLA4	Hours / course
CILO 1	√	√	√	√	
CILO 2	√	√	√	√	
CILO 3	√	√	√	√	
CILO 4	√	√		√	
CILO 5	√	√	√	√	

TLA1: Lecture

Lectures are primarily used to highlight the basic concepts, theories, and empirical findings about human behaviour in individuals and families taking into account biological, psychological, social, and spiritual aspects of human behaviour and experience, which serves as a foundation for generalist social work practice. Providing core information on human behaviour is useful and applicable to knowledge-guided efforts in practice on groups, communities and organizations, and the practicum.

TLA2: Experiential Learning Activities

A variety of activities are employed to enhance students' understanding of the themes on various human behaviour theories issues, and the interdisciplinary perspectives of concerns through lifespan. These activities include group project, mutual feedback, and class discussions.

TLA3: Video Illustration

To stimulate students' interest to further understanding the link between person and environment in an ecological way, audio visual materials including television series and movie scripts are used in lectures to demonstrate some unique features of social work values, ethics and other theoretical concepts. Case demonstrations and stories are also used to stimulate students' interest in lectures.

TLA4: Student Presentation

Student presentations allow students to work as a group to deliver findings of their research project and to share their opinions and thoughts about a chosen related issue across lifespan with the class for deliberation. The aims of this peer-directed activity enhance the students to develop competence in applying knowledge in practice, working as a team, evaluating an ethical issue and presenting a solution in a systematic way, and providing constructive feedback to other groups through cooperative learning.

4. Assessment Tasks/Activities

CILO No.	Type of Assessment Tasks/Activities	Weighting	Remarks
CILO 1-5	AT1: Individual Paper	40%	
CILO 1-5	AT2: Group Presentation	30%	
CILO 1-2	AT3: Quiz	30%	

AT1: Individual Paper (40%)

This **individual paper** requires students to apply **two theories** covered in class to personal experience. This paper will determine 40% of the grade. Use the following suggested outline.

A. Introduction (1 page)

Describe a personal experience. Briefly summarize the details of the experience including the implications the event has had for you personally, how it has affected those around you and your environment. Describe your reactions to the experience.

B. Comparative analysis of the event (4 pages)

Pick two theories of individual and/or family behaviour from the course. Briefly describe how each theory would (1) explain why the personal experience occurred and why you and others reacted as you did; (2) predict consequences for yourself

and others; (3) describe actions you took in response to the situation and alternative actions you might have taken.

C. Preference (2 pages)

Explain your preference for one of these theories or a combination in relation to your personal experience.

D. Reflection (3 pages)

Students are expected to raise questions, reflect and contribute to your learning. Students will be assessed based on their (i) willingness to express their own views; (ii) application of knowledge; (iii) logical thinking; and (iv) clarity in communication.

Note: The total text length for this paper must not exceed 10 pages (2300-2500 words) excluding references.

AT2: Group Presentation (30%)

Students are required to work in small groups on a chosen topic of interest across lifespan related to individual and family behaviour. The goal of this group project is to examine a chosen issue for social work practise, and to apply theoretical concepts to explain a personal or family disruption due to illness, divorce, violence, and discrimination, and the like. Students are expected to apply concepts of the theory, which corresponds to the chosen issue, demonstrate an explicit understanding of principles of critical thoughts using social work lens, and the ability to reflect on issues and/or theories systematically. Each group will make:

A **presentation** aims to share their analyses with other classmates. Students will also lead the discussion and stimulate other students' reflections on various chosen issues. The presentation may include new knowledge/insight gained, and the group's stance/position and recommendations on the issue. Peer review mechanism will be included to ensure equal participation during the group work process.

AT3: Quiz (30%)

Quiz is designed to strengthen students' knowledge and understanding of the core concepts and theories being covered. It is composed of multiple choice questions and short questions. Materials covered in lecture notes, textbook and supplementary readings are reviewed.

5. Grading of Student Achievement:

Letter Grade	Grading criteria in relation to CILOs
A+ A A-	Strong evidence of original thinking in applying knowledge to understand human behaviour in social environment for social work practice; good organization, capacity to analyse and synthesize related knowledge; superior integration of knowledge of human behaviour in social environment; evidence of extensive knowledge base.
B+ B B-	Evidence of grasp of knowledge of human behaviour in social environment for social work practice, some evidence of critical capacity and analytic ability in applying related knowledge; reasonable understanding of related issues; evidence of familiarity with knowledge.
C+ C C-	Student who is profiting from the university experience; understanding on the knowledge of human behaviour in social environment for social work practice; ability to develop solutions to simple problems in human behaviour in social environment.
D	Sufficient familiarity with knowledge of human behaviour in social environment for social work practice; very limited evidence of appropriate analysis on social issues.
F	Little evidence of familiarity with knowledge of human behaviour in social environments; weakness in critical and analytic skills; limited or irrelevant use of knowledge.

Part III

1. Keyword Syllabus

1.1 Traditional paradigm on human growth and development

Life course perspective; systems theory framework; bio-psycho-social-spiritual and cultural theories; human development across the life course: conception, pregnancy, childbirth, infancy, toddlerhood, early childhood, middle childhood, adolescence, young adulthood, middle adulthood, late life, very late life; end of life care issues;

1.2 Understanding of multi-layered, dynamic environment contexts

social contexts of family, organizational and community systems; human diversity and populations-at-risk; characteristics, structures, and dynamic functioning of individuals and families; assessment of human well-being; importance of human diversity and the impact of discrimination and oppression.

1.3 Shifting paradigms in essential knowledge for social work practice

Social work core competence; theoretical perspectives on well-being, strengths, resiliency, empowerment, dysfunction, oppression, and developmental processes are analyzed critically, especially concerning applicability to a social work practice that supports client strengths, appreciates diversity, and promotes social justice.
