

**City University of Hong Kong  
Course Syllabus**

**offered by Department of Computer Science  
with effect from Semester B 2016/17**

---

---

**Part I Course Overview**

<b>Course Title:</b>	Computer Graphics
<b>Course Code:</b>	CS5182
<b>Course Duration:</b>	One semester
<b>Credit Units:</b>	3 credits
<b>Level:</b>	P5
<b>Medium of Instruction:</b>	English
<b>Medium of Assessment:</b>	English
<b>Prerequisites:</b> <i>(Course Code and Title)</i>	CS2303 Data Structures for Media or CS3334 Data Structures or EE3206 Java Programming and Applications
<b>Precursors:</b> <i>(Course Code and Title)</i>	Nil
<b>Equivalent Courses:</b> <i>(Course Code and Title)</i>	Nil
<b>Exclusive Courses:</b> <i>(Course Code and Title)</i>	Nil

## Part II Course Details

### 1. Abstract

This course covers the core concepts and algorithms of 2D/3D computer graphics and the applications of computer graphics technologies. The main objective is to familiarize students with current computer graphics techniques and their applications in different domains.

### 2. Course Intended Learning Outcomes (CILOs)

(CILOs state what the student is expected to be able to do at the end of the course according to a given standard of performance.)

No.	CILOs	Weighting (if applicable)	Discovery-enriched curriculum related learning outcomes (please tick where appropriate)		
			A1	A2	A3
1.	Identify the motivation and the main characteristics of different computer graphics techniques.		✓		
2.	Design and develop computer graphics algorithms.			✓	
3.	Evaluate and critique different types of graphics systems.			✓	
4.	Apply computer graphics techniques to real-world applications.			✓	✓
		100%			

**A1: Attitude**

*Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.*

**A2: Ability**

*Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to self-life problems.*

**A3: Accomplishments**

*Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.*

### 3. Teaching and Learning Activities (TLAs)

(TLAs designed to facilitate students' achievement of the CILOs.)

Teaching pattern:

Suggested lecture/tutorial/laboratory mix: 2 hours lecture; 2 hours laboratory

TLA	Brief Description	CILO No.				Hours/week (if applicable)
		1	2	3	4	
Lecture	The lectures will focus on the introduction of 2D/3D computer graphics techniques, and their applications in different domains.	✓	✓	✓	✓	2 hours/week
Tutorial	In the tutorials, students are provided with exercise questions and asked to complete them during the class. The answers to the exercise questions are then provided and discussed in order for the students to get familiar with the course materials.		✓	✓		1 hour/week
Project	In the project, students are required to apply suitable computer graphics techniques to solve a real world problem. The project may involve OpenGL programming.		✓		✓	3 hours/week for 7 weeks

### 4. Assessment Tasks/Activities (ATs)

(ATs are designed to assess how well the students achieve the CILOs.)

Assessment Tasks/Activities	CILO No.				Weighting	Remarks
	1	2	3	4		
Continuous Assessment: <u>40%</u>						
Quiz	✓	✓	✓		20%	
Course Project		✓		✓	20%	
Examination <sup>^</sup> : <u>60%</u> (duration: 2 hours)						
					100%	

<sup>^</sup> For a student to pass the course, at least 30% of the maximum mark for the examination must be obtained.

## 5. Assessment Rubrics

*(Grading of student achievements is based on student performance in assessment tasks/activities with the following rubrics.)*

Assessment Task	Criterion	Excellent (A+, A, A-)	Good (B+, B, B-)	Adequate (C+, C, C-)	Marginal (D)	Failure (F)
1. Quiz	Capacity in understanding the key concerns of computer graphics techniques	High	Significant	Moderate	Basic	Note even reaching marginal levels
2. Course Project	Ability to apply computer graphics techniques to develop an application	High	Significant	Moderate	Basic	Note even reaching marginal levels
3. Examination	Ability to evaluate computer graphics software and to apply computer graphics techniques on applications	High	Significant	Moderate	Basic	Note even reaching marginal levels

### Part III Other Information (more details can be provided separately in the teaching plan)

#### 1. Keyword Syllabus

(An indication of the key topics of the course.)

2D graphics; 2D transformations and projection; 3D graphics: 3D transformations and projection; clipping; object modelling; rendering pipeline; common ray-tracing techniques; radiosity; aliasing; spatial vs temporal aliasing; anti-aliasing; image processing; window systems.

Syllabus:

2D/3D computer graphics techniques

Graphical input/output devices, 2D primitive drawing, 2D transformation, 3D transformation and projection, clipping, object modeling.

Image Generation Techniques

Some of the important image generation techniques including scan-conversion, ray-tracing and radiosity. Related issues such as shading, anti-aliasing and texture mapping will also be discussed.

Applications of Computer Graphics

Introduction to window system, virtual reality, image processing and multimedia.

#### 2. Reading List

##### 2.1 Compulsory Readings

(Compulsory readings can include books, book chapters, or journal/magazine articles. There are also collections of e-books, e-journals available from the CityU Library.)

##### 2.2 Additional Readings

(Additional references for students to learn to expand their knowledge about the subject.)

1.	J. Hughes, A. van Dam, M. McGuire, D. Sklar, J. Foley, S. Feiner, and K. Akeley (2014) <i>Computer Graphics: Principles and Practice</i> . Addison Wesley, 3 <sup>rd</sup> edition.
2.	J. Foley, A. van Dam, S. Feiner, J. Huges, and R. Phillips (1994). <i>Introduction to Computer Graphics</i> . Addison Wesley.
3.	D. Hearn and M. Baker (2014). <i>Computer Graphics</i> . Prentice-Hall, 4 <sup>th</sup> edition.
