

**City University of Hong Kong  
Course Syllabus**

**offered by Department of Electronic Engineering  
with effect from Semester B in 2015/2016**

---

---

**Part I Course Overview**

<b>Course Title:</b>	Complex Networks: Modeling, Dynamics and Control
<b>Course Code:</b>	EE6605
<b>Course Duration:</b>	One Semester (13 weeks)
<b>Credit Units:</b>	3
<b>Level:</b>	P6
<b>Medium of Instruction:</b>	English
<b>Medium of Assessment:</b>	English
<b>Prerequisites:</b> <i>(Course Code and Title)</i>	Nil
<b>Precursors:</b> <i>(Course Code and Title)</i>	MA3150 Advanced Mathematical Analysis or equivalent
<b>Equivalent Courses:</b> <i>(Course Code and Title)</i>	Nil
<b>Exclusive Courses:</b> <i>(Course Code and Title)</i>	Nil

## Part II Course Details

### 1. Abstract

The aim of this course is to provide students with a good understanding of basic concepts, techniques and principles of complex networks: their modelling, dynamics and control.

### 2. Course Intended Learning Outcomes (CILOs)

(CILOs state what the student is expected to be able to do at the end of the course according to a given standard of performance.)

No.	CILOs	Weighting (if applicable)	Discovery-enriched curriculum related learning outcomes (please tick where appropriate)		
			A1	A2	A3
1.	Apply basic concepts to describe representative network models	30%	✓	✓	✓
2.	Analyze the effects of network structures on dynamical behaviors	20%	✓	✓	✓
3.	Estimate local and global network stability, synchronizability and controllability	10%	✓	✓	
4.	Develop small-scale efficient virus-spreading control algorithms	10%	✓	✓	
5.	Describe the control of data traffic flows and network topological effect	10%	✓	✓	
6.	Apply the learned techniques to solve some practical problems	20%		✓	✓
		100%			

**A1: Attitude**

*Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.*

**A2: Ability**

*Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to self-life problems.*

**A3: Accomplishments**

*Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.*

### 3. Teaching and Learning Activities (TLAs)

(TLAs designed to facilitate students' achievement of the CIOs.)

TLA	Brief Description	CILO No.						Hours/week (if applicable)
		1	2	3	4	5	6	
Weekly lectures, weekly homework	Illustrate basic concepts Demonstrate basic properties Show typical applications	✓	✓	✓	✓	✓		2 hrs homework/week 3 hrs lecture/week
Take-home term project (4 weeks)	Initiate innovative ideas Develop individual designs Perform computer programming						✓	

### 4. Assessment Tasks/Activities (ATs)

(ATs are designed to assess how well the students achieve the CIOs.)

Assessment Tasks/Activities	CILO No.						Weighting	Remarks
	1	2	3	4	5	6		
Continuous Assessment: <u>40%</u>								
Homework 10%	✓	✓	✓	✓	✓		40%	
Take-home Project 30%						✓		
Examination: <u>60%</u> (closed-book exam, duration: 2hrs)								
							100%	

#### Remark:

To pass the course, students are required to achieve at least 35% in course work and 35% in the examination.

**5. Assessment Rubrics**

*(Grading of student achievements is based on student performance in assessment tasks/activities with the following rubrics.)*

Assessment Task	Criterion	Excellent (A+, A, A-)	Good (B+, B, B-)	Adequate (C+, C, C-)	Marginal (D)	Failure (F)
1. Examination	Achievements in CILOs	High	Significant	Moderate	Basic	Not even reaching marginal levels
2. Coursework	Achievements in CILOs	High	Significant	Moderate	Basic	Not even reaching marginal levels

## 6. Constructive Alignment with Programme Outcomes

PILO	How the course contribute to the specific PILO(s)
1,2,3,4,5	Lecturing is the core of teaching. Reading materials will be suggested. One homework assignment will be given each week, for week 2 - week7. One large-scale computer project will be assigned for week 8 - week 12 to complete.
6	The take-home project requires self-motivated design and significant computer simulation demonstrating network science knowledge with clear real-world application background and implication

### Part III Other Information (more details can be provided separately in the teaching plan)

#### 1. Keyword Syllabus

##### Network Structures and Properties

Recent advances in scientific literature including the complexity of models; degree distributions; random graphs; small-world features; scale-free properties; basic network modeling

##### Elementary Graph Theory

Basic concepts; elementary properties; typical algorithms; graph applications

##### Network Dynamics

Network dynamical behaviors; stability and synchronization; network game; community structures; opinion dynamics; evolving networks

##### Network Performances

Internet topology; data traffic; epidemics spreading; cascade failures

##### Network Synchronization and Control

Network synchronization phenomena and criteria; network stabilization and pinning\_control; data traffic congestion control; network synchronizability and controllability

##### Potential Engineering Applications

Internet; power grids; transportation networks; social networks

#### 2. Reading List

##### 2.1 Compulsory Readings

*(Compulsory readings can include books, book chapters, or journal/magazine articles. There are also collections of e-books, e-journals available from the CityU Library.)*

1.	Lecture Notes
----	---------------

##### 2.2 Additional Readings

*(Additional references for students to learn to expand their knowledge about the subject.)*

1.	G. R. Chen, X. F. Wang and X. Li, Introduction to Complex Networks: Models, Structures and Dynamics, High Education Press, Beijing, China, January 2015
2.	X. F. Wang, X. Li and G. R. Chen, Network Science: An Introduction (in Chinese), High Education Press, Beijing, China, April 2012
