Part II  Course Details

1. Abstract

In this course students should demonstrate the ability to function in a team environment to address phases of eCommerce system development from creation of a viable business model to building a prototype eCommerce system for a chosen application. The students should be able to integrate and apply the techniques and knowledge learnt through the other taught courses in the programme.

2. Course Intended Learning Outcomes (CILOs)
(CILOs state what the student is expected to be able to do at the end of the course according to a given standard of performance.)

A1:  Attitude
Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2:  Ability
Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to self-life problems.

A3:  Accomplishments
Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.
3. **Teaching and Learning Activities (TLAs)**
   *(TLAs designed to facilitate students’ achievement of the CILOs.)*

   Teaching pattern:
   Consultations with project supervisor
