Part II Course Details

1. Abstract

This course is a bridging course for students who have studied the Mainland Chinese Law so as to equip them to embark on the study of the Common Law. There are three principal objectives.

The first objective is to introduce students to the common law system in Hong Kong under the following themes:

- (a) The sources of law, their hierarchy, and their makers;
- (b) A brief history of the common law system, and its emphasis on precedents; and
- (c) An overview of the key elements of the legal system in Hong Kong.

The second objective is to equip students with skills in reading and interpreting the different parts of any given judgment. Examples will be drawn from both private and public law so that students acquire a sense of how public law analyses differ from private law analyses, and how ratio decidendi is distinguished from obiter dictum.

The third objective is to equip students with the skills for reading and interpreting statutes. Students will be taught the legislative process so as to enhance their application of such skills in relation to statute law. They will be introduced to the general principles of statutory interpretation with focus on the development of the conventional rules to the contextual/purposive approach adopted in the more recent cases, and the relevance of legislative intent that could be ascertained from the statutes and official record of legislative proceedings. They will be required to apply these principles to selected statutes in class discussions.

The course will be conducted through the Socratic Method.

2. Course Intended Learning Outcomes (CILOs)

(CILOs state what the student is expected to be able to do at the end of the course according to a given standard of performance.)

No.	CILOs	Weighting (if applicable)	Discovery-enriched curriculum related learning outcomes (please tick where appropriate)		
			A1	A2	A3

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

3. Teaching and Learning Activities (TLAs)

(TLAs designed to facilitate students' achievement of the CILOs.)

Duration of course: 10 days.

Course teaching methods: This course will use a discovery-enriched, interactive, seminar-based approach that integrates topic instructions, in-class discussions and end of semester assignments. The course contains formative and summative assessment tasks designed to allow students full opportunity to achieve the CILOs of the course. A student's *meaningful* participation in classes will be taken into account in the overall assessment for the course. Meaningful participation includes, but is not limited to, participation that adds value to the class, contributes to the class' understanding of course materials, and demonstrates the student's own understanding and application of the course materials.

To ensure students obtain the full benefit of this course, students should engage fully in all activities. In addition, students are encouraged to form study groups with their classmates.
