## Part II Course Details

### 1. Abstract

This course aims to provide students with foundational knowledge of contemporary theories on art and the Anthropocene. Emphasis will be placed on reading closely and critically a number of key texts, understanding their historical contexts and discursive positions, and connecting theoretical insights to actual experiences, local and planetary. Students will be guided to develop analytical and argumentative skills through reading and writing. We will also study recent exhibitions to understand how theories are integrated in the curatorial process. By the end of the course, students should have a firm grasp of the contemporary theoretical landscape, be able to articulate a set of concepts and ideas, and possess the skills to work actively with theory in their projects.

### 2. Course Intended Learning Outcomes (CILOs)

(CILOs state what the student is expected to be able to do at the end of the course according to a given standard of performance.)

**A1: Attitude**

*Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.*

**A2: Ability**

*Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to self-life problems.*

**A3: Accomplishments**

*Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.*

### 3. Teaching and Learning Activities (TLAs)

## 5. Assessment Rubrics

(Grading of student achievements is based on student performance in assessment tasks/activities with the following rubrics.)

Applicable to students admitted in Semester A 2022/23 and thereafter

Assessment Task	Criterion	Excellent (A+, A, A-)	Good (B+, B)	Marginal (B-, C+, C)	Failure (F)
1. Response Paper	Students should demonstrate ability to utilize primary and secondary sources, and to construct a well-organized argument and analysis. The threshold of 'discovery' lied in a student's self initiatives to conduct additional research and to personalize theories for her/his personal experience.	<ul style="list-style-type: none"> <li>- Excellent grasp of research material, able to explain key concepts, assumptions and debates</li> <li>- Rigorous organization, coherent structure, distinct thesis, properly argued with strong narrative</li> <li>- Insightful interpretation of the subject matter with distinct themes and thesis</li> <li>- Critical analysis with insightful comments opening up new issues, or suggesting the ability to theorize</li> <li>- Ability to approach a text or a theme using a variety of theories and analytical tools</li> <li>- Strong bibliography suggesting breadth and depth of coverage and informed insights</li> </ul>	<ul style="list-style-type: none"> <li>- Firm grasp of materials, able to explain key concepts and assumptions</li> <li>- Reasonable organization, balanced structure, adequate content, sufficient ability to integrate various resources based on demand</li> <li>- Clear ideas which keep to the point, clear-cut subject, ability to interpret opinions independently</li> <li>- Organized bibliography which can be utilized in accordance with the topic</li> </ul>	<ul style="list-style-type: none"> <li>- Comprehensive grasp of materials, able to explain key concepts</li> <li>- Fair organization, weak structure, adequate content, fair ability to integrate various resources based on demand</li> <li>- Relevant points to the subject matter, fair ability to interpret opinions</li> <li>- Unorganized bibliography which can be utilized in accordance with the topic</li> </ul>	<ul style="list-style-type: none"> <li>- Poor grasp of materials</li> <li>- No organization and structure, inadequate content, no/ irrelevant use of resources</li> <li>- Irrelevant points to the subject matter, minimal ability to interpret opinions</li> <li>- Irrelevant bibliography</li> </ul>

2. Presentation	This assessment will grade on content and fluency of presentation. Students should show their co-operation to conduct a well-organized presentation with their own argument and evidence from readings and practice. The threshold of ‘discovery’ lied in a student’s self initiatives to conduct additional research and to personalize theories and practical strategies.	<ul style="list-style-type: none"> <li>- Rich, informative content, excellent grasp of the material with in-depth and extensive knowledge of the subject matter</li> <li>- Rigorous organization, coherent structure, and systematic exposition with a strong sense of narrative</li> <li>- Superior presentation skills: distinct pronunciation, fluent expression and appropriate diction, exact time-management</li> <li>- Critical analysis with insightful comments opening up new issues, or suggesting the ability to theorize</li> </ul>	<ul style="list-style-type: none"> <li>- Adequate content with firm grasp of the material that informs the audience on a subject matter</li> <li>- Reasonable organization, balanced structure and composition</li> <li>- Good verbal communication: comprehensible pronunciation, fluent expression and diction, fair time-management</li> </ul>	<ul style="list-style-type: none"> <li>- Adequate content with comprehensive grasp of the material demonstrating basic knowledge of the subject matter</li> <li>- Fair organization, weak structure and composition</li> <li>- Fair presentation skills: acceptable pronunciation, expression and diction, fair time-management</li> </ul>	<ul style="list-style-type: none"> <li>- Inadequate content, fail to identify the general ideas with knowledge of the subject matter</li> <li>- No organization, structure or/and composition</li> <li>- Poor presentation skills: marginal pronunciation, expression and diction, minimal time-management</li> </ul>
3. Research Paper	Students should demonstrate ability to apply knowledge and skills to undertake independent research, build up argument and analysis. The threshold of ‘discovery’ lies in a student’s proactively turning theory into praxis, to transform course material into self-owned authorship.	<ul style="list-style-type: none"> <li>- Excellent grasp of materials, ability to explain key concepts, assumptions, and debates, demonstrating sound knowledge of the field</li> <li>- Rich content, exceptional ability to integrate various resources into primary and secondary levels based on demand;</li> <li>- Design and conduct</li> </ul>	<ul style="list-style-type: none"> <li>- Firm grasp of materials, ability to explain key concepts and assumptions</li> <li>- Adequate content, strong ability to integrate various resources into primary and secondary levels based on demand;</li> <li>- Design and conduct research which is built on thorough knowledge of existing theoretical</li> </ul>	<ul style="list-style-type: none"> <li>- Comprehensive grasp of materials, able to explain key concepts</li> <li>- Adequate content, fair ability to integrate various resources into primary and secondary levels based on demand</li> <li>- Design and conduct research which is built on knowledge of theoretical frameworks</li> <li>- Appropriate</li> </ul>	<ul style="list-style-type: none"> <li>- Poor grasp of materials</li> <li>- Inadequate content, without primary and secondary levels</li> <li>- Fail to design and conduct research which is appropriate for the research objective</li> <li>- Fail to make reasonable judgments about existing research</li> <li>- Fail to approach a text or a theme using</li> </ul>
