

BME8122: BIOMEDICAL ENGINEERING DESIGN

Effective Term

Semester B 2024/25

Part I Course Overview

Course Title

Biomedical Engineering Design

Subject Code

BME - Biomedical Engineering

Course Number

8122

Academic Unit

Biomedical Engineering (BME)

College/School

College of Biomedicine (BD)

Course Duration

One Semester

Credit Units

3

Level

R8 - Research Degree

Medium of Instruction

English

Medium of Assessment

English

Prerequisites

Nil

Precursors

Nil

Equivalent Courses

MBE5110/BME5110 Biomedical Engineering Design

Exclusive Courses

Nil

Part II Course Details

Abstract

This course aims to present a broad overview of the field of biomedical engineering to the students who do not have background in life science. It will focus on the common themes of healthcare, including fundamental human physiology

and pathology, biomedical technology, biomedical imaging and molecular imaging, and medical device and medical technology management. Students will learn about basic physiology, biotechnology for disease diagnosis and therapy, and healthcare and wellness, with an emphasis on applying the knowledge to design, engineer and solve problems related to the healthcare industry.

Course Intended Learning Outcomes (CILOs)

CILOs	Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Explain basic concepts and principles of biomedical technology and how it is related to human physiology.	x		
2	Analyse the basic working principles of systems in human body and its relationship with pathology and medical devices to address the healthcare related problems.		x	
3	Identify basic atomic/molecular biology that can be used as readout for disease monitoring using medical devices.		x	
4	Design healthcare and disease management schemes by applying the knowledge in - biomedical engineering and imaging for promoting, sustaining and advancing quality care and health care.	x		x

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

Learning and Teaching Activities (LTAs)

LTAs	Brief Description	CILO No.	Hours/week (if applicable)	
1	Lecture	Explain key concepts related to biomedical engineering.	1, 2, 3, 4	2 hrs/week
2	Tutorial	Recap and expand the materials taught in lectures.	1, 2, 3, 4	1 hr/week
3	Group project	Provide opportunities for students to integrate the principles taught in lectures through case studies	2, 3, 4	

Assessment Tasks / Activities (ATs)

	ATs	CILO No.	Weighting (%)	Remarks (e.g. Parameter for GenAI use)
1	Midterm Test	1, 2, 3	30	
2	Group Project	2, 3, 4	20	
3	Assignment	1, 2, 3	20	

Continuous Assessment (%)

70

Examination (%)

Examination Duration (Hours)

2

Assessment Rubrics (AR)**Assessment Task**

Examination (for students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter)

Criterion

Ability to analyse the human healthcare problems in details, from molecular to system level; and to apply the biomedical engineering approach to address common problems in the healthcare industry.

Excellent

(A+, A, A-) High

Good

(B+, B, B-) Significant

Fair

(C+, C, C-) Moderate

Marginal

(D) Basic

Failure

(F) Not even reaching marginal levels

Assessment Task

Midterm Test (for students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter)

Criterion

Ability to identify essential biomedical tools to guide disease diagnosis and therapy, and to explain the biomedical engineering principles behind.

Excellent

(A+, A, A-) High

Good

(B+, B, B-) Significant

Fair

(C+, C, C-) Moderate

Marginal

(D) Basic

Failure

(F) Not even reaching marginal levels

Assessment Task

Group Project (for students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter)

Criterion

Ability to utilize the materials taught in lectures to analyse and develop customized biomedical management/solutions to healthcare problems.

Excellent

(A+, A, A-) High

Good

(B+, B, B-) Significant

Fair

(C+, C, C-) Moderate

Marginal

(D) Basic

Failure

(F) Not even reaching marginal levels

Assessment Task

Assignment (for students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter)

Criterion

Ability to apply the biomedical concepts precisely to study healthcare problems in details, and to identify the important concepts and theory of different biomedical engineering systems.

Excellent

(A+, A, A-) High

Good

(B+, B, B-) Significant

Fair

(C+, C, C-) Moderate

Marginal

(D) Basic

Failure

(F) Not even reaching marginal levels

Assessment Task

Examination (for students admitted from Semester A 2022/23 to Summer Term 2024)

Criterion

Ability to analyse the human healthcare problems in details, from molecular to system level; and to apply the biomedical engineering approach to address common problems in the healthcare industry.

Excellent

(A+, A, A-) High

Good

(B+, B) Significant

Marginal

(B-, C+, C) Basic

Failure

(F) Not even reaching marginal levels

Assessment Task

Midterm Test (for students admitted from Semester A 2022/23 to Summer Term 2024)

Criterion

Ability to identify essential biomedical tools to guide disease diagnosis and therapy, and to explain the biomedical engineering principles behind.

Excellent

(A+, A, A-) High

Good

(B+, B) Significant

Marginal

(B-, C+, C) Basic

Failure

(F) Not even reaching marginal levels

Assessment Task

Group Project (for students admitted from Semester A 2022/23 to Summer Term 2024)

Criterion

Ability to utilize the materials taught in lectures to analyse and develop customized biomedical management/solutions to healthcare problems.

Excellent

(A+, A, A-) High

Good

(B+, B) Significant

Marginal

(B-, C+, C) Basic

Failure

(F) Not even reaching marginal levels

Assessment Task

Assignment (for students admitted from Semester A 2022/23 to Summer Term 2024)

Criterion

Ability to apply the biomedical concepts precisely to study healthcare problems in details, and to identify the important concepts and theory of different biomedical engineering systems.

Excellent

(A+, A, A-) High

Good

(B+, B) Significant

Marginal

(B-, C+, C) Basic

Failure

(F) Not even reaching marginal levels

Part III Other Information

Keyword Syllabus

Biomedical Engineering, Biological Systems, Biomaterials, Radiology, Biomedical Imaging, X-ray computed tomography, Ultrasound imaging, Magnetic resonance imaging, Positron emission tomography, Contrast agent and molecular imaging, Medical devices, Quality assurance, Medical device and medical technology management, Healthcare Industry

Reading List**Compulsory Readings**

Title	
1	Nil
