

# CA5252: BUILDING ENVIRONMENT MODELLING FOR SUSTAINABILITY ANALYSIS

---

## Effective Term

Semester A 2025/26

## Part I Course Overview

### Course Title

Building Environment Modelling for Sustainability Analysis

### Subject Code

CA - Civil and Architectural Engineering

### Course Number

5252

### Academic Unit

Architecture and Civil Engineering (CA)

### College/School

College of Engineering (EG)

### Course Duration

One Semester

### Credit Units

3

### Level

P5, P6 - Postgraduate Degree

### Medium of Instruction

English

### Medium of Assessment

English

### Prerequisites

Nil

### Precursors

Nil

### Equivalent Courses

Nil

### Exclusive Courses

Nil

## Part II Course Details

### Abstract

The course aims to provide students with an overview of the popular building energy modelling tools; an understanding of the underlying principles in modelling building energy systems; and an ability of application for system design and facilities management.

### Course Intended Learning Outcomes (CILOs)

CILOs	Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Describe the features and capabilities of common tools for building energy modelling.	x		
2	Discuss the principles, mechanisms, assumptions and limitations in modelling the typical building energy systems, such as HVAC and lighting.	x	x	
3	Discuss the principles, mechanisms, assumptions and limitations in modelling the advanced building energy systems, such as trigeneration and renewable energy systems.	x	x	
4	Apply building energy modelling for system design, energy management and retro-commissioning.		x	

#### A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

#### A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

#### A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

### Learning and Teaching Activities (LTAs)

LTAs	Brief Description	CILO No.	Hours/week (if applicable)	
1	Lectures; seminars	Introduce and discuss the principles of common tools for building energy modelling of various building energy systems according to engineering practice and development.	1, 2, 3, 4	2
2	Tutorials; site visits	Discuss and apply the skills of building energy modelling of various building energy systems for system design, energy management and retro-commissioning.	2, 3, 4	1

**Additional Information for LTAs**

Semester Hours: 3 hours per week

Lecture/Tutorial/Laboratory Mix: Lecture (2); Tutorial (1); Laboratory (0)

**Assessment Tasks / Activities (ATs)**

	ATs	CILO No.	Weighting (%)	Remarks ("- for nil entry)	Allow Use of GenAI?
1	Mid-term test	1, 2	25	-	No
2	Assignment	2, 3, 4	25	-	No

**Continuous Assessment (%)**

50

**Examination (%)**

50

**Examination Duration (Hours)**

2

**Minimum Continuous Assessment Passing Requirement (%)**

30

**Minimum Examination Passing Requirement (%)**

30

**Additional Information for ATs**

To pass a course, a student must obtain minimum marks of 30% in both coursework and examination components, and an overall mark of at least 40%

**Assessment Rubrics (AR)****Assessment Task**

Mid-term test (for students admitted before Semester A 2022/23 and in Semester A 2024/25 &amp; thereafter)

**Criterion**

1. ABILITY to RECOGNIZE and EXPLAIN the key principles, mechanisms, assumptions and limitations of building energy modelling tools.

**Excellent**

(A+, A, A-) High

**Good**

(B+, B, B-) Significant

**Fair**

(C+, C, C-) Moderate

**Marginal**

(D) Basic

**Failure**

(F) Not even reaching marginal levels

### Assessment Task

Assignment (for students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter)

#### Criterion

1. CAPACITY to INQUIRE and ANALYSE the issues and relevant information and references with respect to given scenarios and context.
2. ABILITY to PRODUCE and ARTICULATE rational, substantiated and original discussion and/or suggestion.

#### Excellent

(A+, A, A-) High

#### Good

(B+, B, B-) Significant

#### Fair

(C+, C, C-) Moderate

#### Marginal

(D) Basic

#### Failure

(F) Not even reaching marginal levels

---

### Assessment Task

Examination (for students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter)

#### Criterion

1. ABILITY to EXPLAIN and DISCUSS the key principles, mechanisms, assumptions and limitations of building energy modelling tools for system design and facilities management.

#### Excellent

(A+, A, A-) High

#### Good

(B+, B, B-) Significant

#### Fair

(C+, C, C-) Moderate

#### Marginal

(D) Basic

#### Failure

(F) Not even reaching marginal levels

---

### Assessment Task

Mid-term test (for students admitted from Semester A 2022/23 to Summer Term 2024)

#### Criterion

1. ABILITY to RECOGNIZE and EXPLAIN the key principles, mechanisms, assumptions and limitations of building energy modelling tools.

**Excellent**

(A+, A, A-) High

**Good**

(B+, B) Significant

**Marginal**

(B-, C+, C) Basic

**Failure**

(F) Not even reaching marginal levels

---

**Assessment Task**

Assignment (for students admitted from Semester A 2022/23 to Summer Term 2024)

**Criterion**

1. CAPACITY to INQUIRE and ANALYSE the issues and relevant information and references with respect to given scenarios and context.
2. ABILITY to PRODUCE and ARTICULATE rational, substantiated and original discussion and/or suggestion.

**Excellent**

(A+, A, A-) High

**Good**

(B+, B) Significant

**Marginal**

(B-, C+, C) Basic

**Failure**

(F) Not even reaching marginal levels

---

**Assessment Task**

Examination (for students admitted from Semester A 2022/23 to Summer Term 2024)

**Criterion**

1. ABILITY to EXPLAIN and DISCUSS the key principles, mechanisms, assumptions and limitations of building energy modelling tools for system design and facilities management.

**Excellent**

(A+, A, A-) High

**Good**

(B+, B) Significant

**Marginal**

(B-, C+, C) Basic

**Failure**

(F) Not even reaching marginal levels

---

## Part III Other Information

### Keyword Syllabus

Thermal load solution method. Cooling and heating system simulation. Illuminance and lighting modelling. Modelling of advanced energy systems. Renewable energy system modelling. Application in system design and facilities management.

### Reading List

#### Compulsory Readings

Title	
1	Nil

#### Additional Readings

Title	
1	Code of Practice for Energy Efficiency of Building Services Installation, Electrical and Mechanical Services Department, Hong Kong SAR Government, 2021 (or latest edition).
2	Code of Practice for Building Energy Audit, Electrical and Mechanical Services Department, Hong Kong SAR Government, 2021 (or latest edition).
3	Technical Guidelines on Retro-commissioning, Electrical and Mechanical Services Department, Hong Kong SAR Government, 2018 (or latest edition).
4	ASHRAE Handbook – Fundamentals 2021 (or latest edition)
5	ASHRAE Handbook – HVAC Systems and Equipment 2020 (or latest edition)
6	ASHRAE Handbook – Applications 2019 (or latest edition)
7	EnergyPlus. <a href="https://energyplus.net/">https://energyplus.net/</a>
8	TRNSYS. <a href="http://www.trnsys.com/">http://www.trnsys.com/</a>
9	DIALux. <a href="https://www.dial.de/en/dialux/">https://www.dial.de/en/dialux/</a>
