

# MNE5101: PRINCIPLES OF NUCLEAR ENGINEERING

---

## Effective Term

Semester A 2025/26

## Part I Course Overview

### Course Title

Principles of Nuclear Engineering

### Subject Code

MNE - Mechanical Engineering

### Course Number

5101

### Academic Unit

Mechanical Engineering (MNE)

### College/School

College of Engineering (EG)

### Course Duration

One Semester

### Credit Units

3

### Level

P5, P6 - Postgraduate Degree

### Medium of Instruction

English

### Medium of Assessment

English

### Prerequisites

Nil

### Precursors

MNE3107 Principles of Nuclear Engineering or equivalent

### Equivalent Courses

Nil

### Exclusive Courses

Nil

## Part II Course Details

### Abstract

This course aims to establish the professional background for nuclear engineering students, is an advanced course to the course of “Basic Principles and Theory of Fission Reactors” . The contents of the course are emphasized at the key issues concerning the origins and applications of nuclear energy. At the very beginning of the course, atomic and nuclear physics is reviewed, while the ways that radiation particles interact with matter is introduced subsequently. Furthermore, the course directs to the practical aspects of nuclear power, nuclear reactors, and nuclear cycles. Finally, the major part of the course leads to nuclear reactor theory which includes the topics such as criticality, neutron diffusion and moderation, one- and multi-energy-group models, and time-dependent neutronics behaviours.

### Course Intended Learning Outcomes (CILOs)

CILOs	Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Describe the fundamental of atomic and nuclear physics related nuclear fission and how radiation particles interact with matter.	x	x	
2	Explain the concepts of nuclear reactors and nuclear cycles.		x	
3	Perform neutron diffusion and criticality calculation under various conditions.		x	x
4	Analyze reactivity feedback effects due to the variations in temperature, fission product poisoning, fuel burnup, etc.		x	x

#### A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

#### A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

#### A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

### Learning and Teaching Activities (LTAs)

LTAs	Brief Description	CILO No.	Hours/week (if applicable)	
1	Lecture	Delivery of the course will be achieved through a series of formal lectures supported by practical case studies.	1, 2, 3, 4	3 hrs/week
2	(Self-study Activities)	Students will be provided with reading lists to assist their study of the subject, and they will be expected to prepare material in advance of the sessions for discussion.	1, 2, 3, 4	(34 hours)

### Assessment Tasks / Activities (ATs)

	ATs	CILO No.	Weighting (%)	Remarks ("-" for nil entry)	Allow Use of GenAI?
1	Homework	1, 2, 3, 4	25	-	Yes
2	Mini-project	2, 3, 4	15	-	Yes

**Continuous Assessment (%)**

40

**Examination (%)**

60

**Examination Duration (Hours)**

2

**Minimum Continuous Assessment Passing Requirement (%)**

30

**Minimum Examination Passing Requirement (%)**

30

**Additional Information for ATs**

For a student to pass the course, at least 30% of the maximum mark for both coursework and examination should be obtained.

**Assessment Rubrics (AR)****Assessment Task**

Examination (for students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter)

**Criterion**

Through examination, the students will be evaluated on the basics and principles of nuclear engineering

**Excellent**

(A+, A, A-) High

**Good**

(B+, B, B-) Significant

**Fair**

(C+, C, C-) Moderate

**Marginal**

(D) Basic

**Failure**

(F) Not even reaching marginal levels

**Assessment Task**

Homework (for students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter)

**Criterion**

Tutorials mainly covering the topics of lectures

**Excellent**

(A+, A, A-) High

**Good**

(B+, B, B-) Significant

**Fair**

(C+, C, C-) Moderate

**Marginal**

(D) Basic

**Failure**

(F) Not even reaching marginal levels

---

**Assessment Task**

Mini-project (for students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter)

**Criterion**

Mini-projects mainly covering the related topics of lectures

**Excellent**

(A+, A, A-) High

**Good**

(B+, B, B-) Significant

**Fair**

(C+, C, C-) Moderate

**Marginal**

(D) Basic

**Failure**

(F) Not even reaching marginal levels

---

**Assessment Task**

Examination (for students admitted from Semester A 2022/23 to Summer Term 2024)

**Criterion**

Through examination, the students will be evaluated on the basics and principles of nuclear engineering

**Excellent**

(A+, A, A-) High

**Good**

(B+, B) Significant

**Marginal**

(B-, C+, C) Moderate

**Failure**

(F) Not even reaching marginal levels

**Assessment Task**

Homework (for students admitted from Semester A 2022/23 to Summer Term 2024)

**Criterion**

Tutorials mainly covering the topics of lectures

**Excellent**

(A+, A, A-) High

**Good**

(B+, B) Significant

**Marginal**

(B-, C+, C) Moderate

**Failure**

(F) Not even reaching marginal levels

---

**Assessment Task**

Mini-project (for students admitted from Semester A 2022/23 to Summer Term 2024)

**Criterion**

Mini-projects mainly covering the related topics of lectures

**Excellent**

(A+, A, A-) High

**Good**

(B+, B) Significant

**Marginal**

(B-, C+, C) Moderate

**Failure**

(F) Not even reaching marginal levels

---

## Part III Other Information

**Keyword Syllabus**

- uranium enrichment
- radioactive decay
- activity
- mass defect
- nuclear binding energy
- cross section
- neutron attenuation
- compound nucleus formation
- radiation
- nuclear fission / fusion
- chain reaction

- prompt / delayed neutrons
- neutron moderation
- lethargy
- fissile / fissionable / fertile isotopes
- fission products
- nuclear conversion / breeding
- burnup
- reflector
- pressurized-water / boiling-water reactors
- control rod / chemical shim
- nuclear fuel cycles
- nuclear fuel management
- spent fuel / radioactive waste
- neutron transport / diffusion
- criticality
- multiplication factor
- reactivity

### Reading List

#### Compulsory Readings

Title	
1	Nil

#### Additional Readings
