

# PHY8502: ADVANCED COMPUTATIONAL METHODS FOR SIMULATION AND MODELLING

---

## Effective Term

Semester A 2025/26

## Part I Course Overview

### Course Title

Advanced Computational Methods for Simulation and Modelling

### Subject Code

PHY - Physics

### Course Number

8502

### Academic Unit

Physics (PHY)

### College/School

College of Science (SI)

### Course Duration

One Semester

### Credit Units

3

### Level

R8 - Research Degree

### Medium of Instruction

English

### Medium of Assessment

English

### Prerequisites

Nil

### Precursors

Nil

### Equivalent Courses

AP8172 Simulation and Modelling in Multidisciplinary Sciences

### Exclusive Courses

AP6172 Simulation and Modelling in Multidisciplinary Sciences, PHY6502 Advanced Computational Methods for Simulation and Modelling

## Part II Course Details

### Abstract

This course covers a range of topics and methods in multidisciplinary sciences that involve simulation and modelling. Its central aims are: (1) to describe basic theory and its numerical computation, (2) to introduce existing software that can be used to solve problems in multidisciplinary sciences, and (3) to guide students from the materials science, physics, chemistry, life science, and finance to do a discovery oriented multidisciplinary project such as new materials design, new physics exploration, DNA repair, drug design, or finance market prediction.

### Course Intended Learning Outcomes (CILOs)

	CILOs	Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Recognize the importance of simulation and modeling in multidisciplinary sciences.	10	x		
2	Demonstrate a few problems in multidisciplinary sciences using simulation and modelling tools.	20		x	
3	Identify the key variables that determine the quality and reliability of simulation and modelling.	10	x		
4	Apply basic simulation and modelling tools to solve simple problems in one of the following areas: materials science, physics, chemistry, life science, and finance.	25			x
5	Apply the basic concepts, theories and tools to a discovery-oriented project in student' s own discipline such as: new materials design, new physics exploration, DNA repair, drug design, financial market prediction, etc.	25			x
6	Identify state-of-the-art developments in the relevant area, to form opinions on specific issues and to demonstrate independent problem-solving ability.	10	x		

#### A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

#### A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

#### A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

### Learning and Teaching Activities (LTAs)

LTAs	Brief Description	CILO No.	Hours/week (if applicable)
1	Lectures	1, 2, 3, 4	14hrs/7wks (wk: 1-7)
2	Tutorials	1, 2, 3, 4	6hrs/6wks (wk: 2-7)
3	Projects	5, 6	21hrs/6wks (last 6 wks)

**Assessment Tasks / Activities (ATs)**

ATs	CILO No.	Weighting (%)	Remarks ("-" for nil entry)	Allow Use of GenAI?	
1	Assignments	1, 2, 3, 4	20	performance assessment purpose	Yes
2	Mid-term Test	1, 2, 3, 4	30	performance assessment purpose (week 7)	No
3	Project	5, 6	50	Inc. project report and presentation	No

**Continuous Assessment (%)**

100

**Examination (%)**

0

**Minimum Continuous Assessment Passing Requirement (%)**

0

**Minimum Examination Passing Requirement (%)**

0

**Assessment Rubrics (AR)****Assessment Task**

Assignments (for students admitted before Semester A 2022/23 and in Semester A 2024/25 &amp; thereafter)

**Criterion**

The student completes all assessment tasks/activities including answers to questions and simulations of representative systems relating to the topics taught and the work demonstrates excellent understanding of the scientific principles and the working mechanisms.

**Excellent**

(A+, A, A-) High(excellent accomplishment with creativity and correct understanding)

**Good**

(B+, B, B-) Significant(good accomplishment with mostly correct understanding)

**Fair**

(C+, C, C-) Moderate(fair accomplishment with some correct understanding)

**Marginal**

(D) Basic(essential accomplishment with basic understanding)

**Failure**

(F) Not reaching marginal level

**Assessment Task**

Mid-term Test (for students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter)

**Criterion**

He/she can thoroughly identify and explain how the principles are applied to science and technology for solving multidisciplinary sciences problems.

**Excellent**

(A+, A, A-) High(excellent accomplishment with creativity and correct understanding)

**Good**

(B+, B, B-) Significant(good accomplishment with mostly correct understanding)

**Fair**

(C+, C, C-) Moderate(fair accomplishment with some correct understanding)

**Marginal**

(D) Basic(essential accomplishment with basic understanding)

**Failure**

(F) Not reaching marginal level

---

**Assessment Task**

Project (for students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter)

**Criterion**

The student's work shows strong evidence of original thinking, supported by a variety of properly documented information sources other than taught materials. He/she is able to communicate ideas effectively and persuasively via written texts and/or oral presentation.

**Excellent**

(A+, A, A-) High(excellent accomplishment with creativity and correct understanding)

**Good**

(B+, B, B-) Significant(good accomplishment with mostly correct understanding)

**Fair**

(C+, C, C-) Moderate(fair accomplishment with some correct understanding)

**Marginal**

(D) Basic(essential accomplishment with basic understanding)

**Failure**

(F) Not reaching marginal level

---

**Assessment Task**

Assignments (for students admitted from Semester A 2022/23 to Summer Term 2024)

**Criterion**

The student completes all assessment tasks/activities including answers to questions and simulations of representative systems relating to the topics taught and the work demonstrates excellent understanding of the scientific principles and the working mechanisms.

**Excellent**

(A+, A, A-) High(excellent accomplishment with creativity and correct understanding)

**Good**

(B+, B) Significant(good accomplishment with mostly correct understanding)

**Marginal**

(B-, C+, C) Basic(essential accomplishment with basic understanding)

**Failure**

(F) Not reaching marginal level

---

**Assessment Task**

Mid-term Test (for students admitted from Semester A 2022/23 to Summer Term 2024)

**Criterion**

He/she can thoroughly identify and explain how the principles are applied to science and technology for solving multidisciplinary sciences problems.

**Excellent**

(A+, A, A-) High(excellent accomplishment with creativity and correct understanding)

**Good**

(B+, B) Significant(good accomplishment with mostly correct understanding)

**Marginal**

(B-, C+, C) Basic(essential accomplishment with basic understanding)

**Failure**

(F) Not reaching marginal level

---

**Assessment Task**

Project (for students admitted from Semester A 2022/23 to Summer Term 2024)

**Criterion**

The student's work shows strong evidence of original thinking, supported by a variety of properly documented information sources other than taught materials. He/she is able to communicate ideas effectively and persuasively via written texts and/or oral presentation.

**Excellent**

(A+, A, A-) High(excellent accomplishment with creativity and correct understanding)

**Good**

(B+, B) Significant(good accomplishment with mostly correct understanding)

**Marginal**

(B-, C+, C) Basic(essential accomplishment with basic understanding)

**Failure**

(F) Not reaching marginal level

**Part III Other Information****Keyword Syllabus**

- Introduction: Advances in computational methods and tools. Computer-aided design and simulation in multidisciplinary areas including materials science, physics, chemistry, life science, and finance.
- Monte Carlo methods: History. Applications areas. Use in mathematics. Monte Carlo and random numbers.
- Molecular dynamics simulation: Areas of Application. Design Constraints. Potentials. Molecular dynamics algorithms.
- Numerical optimization methods: Conjugate gradient method. Simulated annealing. Genetic algorithms.
- Machine learning methods: Supervised learning. Unsupervised learning. Reinforcement learning.
- Project: A discovery oriented multidisciplinary project such as new materials design, new physics exploration, DNA repair, drug design, or financial market prediction.

**Reading List****Compulsory Readings**

Title	
1	“Monte Carlo method” , <a href="http://en.wikipedia.org/wiki/Monte_Carlo_method">http://en.wikipedia.org/wiki/Monte_Carlo_method</a>
2	“Molecular dynamics” , <a href="http://en.wikipedia.org/wiki/Molecular_dynamics">http://en.wikipedia.org/wiki/Molecular_dynamics</a>
3	“Mathematical optimization” , <a href="http://en.wikipedia.org/wiki/Mathematical_optimization">http://en.wikipedia.org/wiki/Mathematical_optimization</a>
4	“Finite element method” , <a href="https://en.wikipedia.org/wiki/Finite_element_method">https://en.wikipedia.org/wiki/Finite_element_method</a>
5	“Finite difference Methods” <a href="https://en.wikipedia.org/wiki/Finite_difference_method">https://en.wikipedia.org/wiki/Finite_difference_method</a>
